

Go Industries Inc Announces Enhanced Mudguards Line for Commercial Dually Trucks

April 02, 2026

Richardson, TX - April 02, 2026 -
Go Industries Inc, a Richardson, Texas-based manufacturer of commercial truck accessories, announces the availability of its enhanced line of heavy-duty mudguards designed specifically for dually trucks operating in demanding commercial and fleet applications.

The expanded product line addresses the growing need for superior debris protection in commercial trucking operations, where dual rear wheel configurations require specialized mudguard solutions. The enhanced Go Industries mudguards feature non-recycled rubber construction and reinforced mounting systems engineered to withstand the rigorous demands of commercial vehicle operations.

"Commercial fleet operators have consistently requested more durable mudguard solutions that can handle the unique challenges of dually truck configurations," said a Go Industries spokesperson. "These enhanced mudguards represent our commitment to providing protection systems that meet the specific needs of heavy-duty commercial vehicles while maintaining the quality standards our customers have relied on since

1978."

The enhanced mudguard line includes multiple configuration options to accommodate various dually truck models from major manufacturers, including Chevrolet, GMC, Ford, and Dodge Ram. Each set features precision-engineered mounting brackets designed for secure attachment and long-term durability in commercial applications. The products range from classic dually sets to premium stainless steel and diamond tread options, providing fleet managers with choices to match their specific operational requirements.

Dually trucks, with their dual rear wheels on each side, present unique challenges for debris management and vehicle protection. The specialized design of these mudguards addresses the wider wheel stance and increased debris deflection requirements inherent in dual wheel configurations. The non-recycled rubber construction provides consistent performance and durability advantages over recycled alternatives, particularly important for vehicles operating in harsh conditions or carrying heavy loads.

The company's focus on commercial-grade accessories extends beyond mudguards to include a comprehensive range of truck protection systems. Additional accessories in the Go Industries catalog include grille guards, winch application systems, bumper replacements, headache racks, and specialized law enforcement equipment. This broad product portfolio positions the company as a single-source supplier for commercial fleet operators seeking integrated vehicle protection solutions.

The enhanced mudguard line carries the same three-year warranty coverage that applies to other Go Industries products, covering materials, workmanship, and finish. This warranty commitment reflects the company's confidence in the durability and performance of its commercial-grade accessories.

Go Industries Inc has served the commercial trucking and law enforcement industries for over four decades, establishing itself as a trusted supplier of vehicle protection systems and custom manufacturing solutions. The company maintains Platinum Status with SEMA, recognizing its commitment to quality and innovation in the automotive aftermarket industry. Based in Richardson, Texas, Go Industries continues to expand its product offerings to meet evolving commercial vehicle protection requirements while maintaining its focus on American-made quality and durability.
