

Drake's 7 Dees Landscaping and Garden Center Expands Sprinkler Installation Services to Meet Growing Demand for Water-Efficient Landscapes

March 31, 2026

Portland, Oregon - March 31, 2026 -
Drake's 7 Dees Landscaping and Garden Center has expanded its sprinkler installation services throughout the Portland area in response to increasing homeowner demand for water-efficient irrigation systems. The expansion comes as Oregon residents seek sustainable landscaping solutions that conserve water while maintaining healthy, vibrant outdoor spaces.

The Portland-based landscape design company, which has served the region for over 60 years, reports a significant increase in requests for modern irrigation systems that incorporate smart technology and water-saving features. The expanded services include comprehensive sprinkler system design, professional installation, and ongoing maintenance programs tailored to each property's unique requirements.

"Homeowners are increasingly aware of the importance of efficient water management in their landscapes," said Drake Snodgrass, founder of Drake's 7 Dees. "Our expanded sprinkler installation services address this

need by combining advanced irrigation technology with sustainable design principles that reduce water waste while ensuring optimal plant health."

The company's approach to Drake's 7 Dees Landscaping and Garden Center sprinkler installation emphasizes precision placement of sprinkler heads, proper zoning for different plant water requirements, and integration of rain sensors and smart controllers. These systems automatically adjust watering schedules based on weather conditions, soil moisture levels, and seasonal changes, potentially reducing outdoor water usage by up to 30 percent compared to traditional irrigation methods.

Beyond installation, the company offers comprehensive sprinkler maintenance services including spring activation, winterization, and regular system inspections. These preventive measures help homeowners avoid costly repairs and ensure their irrigation systems operate at peak efficiency throughout the year.

The expansion also includes enhanced training for installation crews on the latest irrigation technologies and water conservation techniques. Team members receive ongoing education about soil science, plant water requirements, and emerging irrigation innovations to provide clients with the most current and effective solutions.

Drake's 7 Dees integrates sprinkler system design with its broader landscape architecture services, ensuring irrigation solutions complement overall landscape plans. This holistic approach considers factors such as plant selection, soil conditions, sun exposure, and natural drainage patterns to create cohesive outdoor environments that thrive with minimal water input.

The company's commitment to sustainable practices extends beyond water conservation. Installation teams use eco-friendly materials whenever possible and follow best practices for minimizing landscape disruption during installation. Native plant recommendations and drought-tolerant landscape designs further support water conservation goals.

Drake's 7 Dees Landscaping and Garden Center has established itself as a leader in sustainable landscape design and maintenance in the Portland metropolitan area. The company offers a comprehensive range of services including landscape architecture, outdoor lighting design, garden maintenance, and various hardscape features. With its lifetime plant warranty and focus on sustainable practices, Drake's 7 Dees continues to transform residential properties into beautiful, environmentally responsible outdoor spaces that enhance both property values and quality of life for homeowners throughout the region.
