

Synergistiq Wellness Introduces EBOO Therapy to Meet Growing Demand for Advanced Detoxification in Tampa

March 31, 2026

TAMPA, FL - March 31, 2026 -
Synergistiq Wellness - Tampa has introduced Extracorporeal Blood Oxygenation and Ozonation (EBOO) therapy to its comprehensive suite of holistic medicine services, responding to increasing patient interest in advanced detoxification and wellness treatments. The addition of this innovative therapy addresses the growing demand from Tampa area residents seeking alternatives to traditional medical approaches for chronic conditions and overall health optimization.

EBOO therapy represents a significant advancement in blood purification technology, utilizing medical-grade ozone to cleanse and oxygenate blood outside the body before returning it to the patient's circulation. The treatment has gained attention in the integrative medicine community for its potential to support the body's natural detoxification processes and enhance cellular function.

"The introduction of EBOO therapy aligns with our commitment to providing cutting-edge holistic treatments that address the root causes of health concerns," said Dr. Deepa Verma, Medical Director at Synergistiq

Wellness. "We've seen remarkable interest from patients who are seeking comprehensive detoxification solutions, particularly those dealing with chronic fatigue, autoimmune conditions, and the effects of environmental toxin exposure."

The therapy involves drawing blood from the patient, passing it through a specialized filtration system where it is exposed to medical ozone, and then returning the treated blood to the body. This process typically takes between 60 to 90 minutes and is performed under strict medical supervision. The treatment is designed to reduce inflammatory markers, eliminate toxins, and improve oxygen utilization at the cellular level.

Synergistiq Wellness - Tampa Eboo therapy sessions are conducted in a controlled clinical environment by trained medical professionals. The facility has invested in state-of-the-art equipment and comprehensive staff training to ensure patient safety and treatment efficacy. Each patient undergoes a thorough evaluation before beginning treatment to determine suitability and develop a personalized protocol.

"The response from our patients has been overwhelmingly positive," noted Dr. Verma. "Many report increased energy levels, improved mental clarity, and a general sense of wellbeing following their EBOO therapy sessions. While individual results vary, we're encouraged by the outcomes we're observing, particularly for patients who haven't found relief through conventional treatments alone."

The growing interest in EBOO therapy reflects broader trends in healthcare, with more individuals seeking integrative approaches that combine traditional and alternative medicine. Recent industry data indicates that the global market for ozone therapy and related treatments has expanded significantly over the past five years, driven by increased awareness and clinical research supporting its applications.

Synergistiq Wellness specializes in holistic medicine and integrative health solutions, offering a range of services designed to support optimal wellness and address chronic health conditions. The practice combines conventional medical knowledge with evidence-based alternative therapies to create comprehensive treatment plans tailored to individual patient needs. Located in Tampa, the facility serves patients throughout the greater Tampa Bay area seeking advanced wellness and detoxification treatments.
