Alpha Plumbing, Heating & Cooling Highlights Role of Licensed Plumber in Residential Services

March 30, 2026

BLOOMINGTON, MN - March 30, 2026 -
Alpha Plumbing, Heating & Cooling has highlighted the contributions of its licensed plumbers in Bloomington, MN, delivering residential plumbing services across the Twin Cities area. The company emphasizes the expertise of its plumbers in managing a variety of installations, repairs, and emergency responses to maintain functional plumbing systems in homes. This focus comes as households address routine maintenance and unexpected issues throughout the year.

The plumber at Alpha Plumbing, Heating & Cooling handles installations of fixtures such as faucets, showerheads, sinks, and toilets, along with new piping for water supply and waste lines. These installations support updates in bathrooms and kitchens where reliable water flow is required. Repairs include fixing leaks in pipes, addressing burst pipes, and resolving malfunctions in garbage disposals and water heaters. The plumber performs leak detection to locate sources of water loss and conducts repairs to prevent further damage.

Remodel services involve reconfiguring plumbing during home renovations, such as kitchen or bathroom updates, with adjustments to pipes and fixtures to fit new layouts while adhering to code requirements. Water

heater services cover installation, repair, and maintenance to ensure a consistent hot water supply, a critical element for daily household use.

Emergency services provided by the plumber respond to urgent situations, including flooding from burst pipes, severe leaks, and other immediate plumbing failures. These responses aim to mitigate damage and restore systems promptly.

Gas services managed by the plumber include installation and repair of gas lines, hookups for appliances like stoves, ovens, dryers, and water heaters, leak detection with pressure testing, and carbon monoxide safety checks. Maintenance and upgrades keep gas systems operational, with emergency handling for gas-related concerns.

Drain services encompass cleaning and unclogging of kitchen, bathroom, and utility drains, sewer line inspections using camera technology, pipe repairs, hydro-jetting to remove stubborn blockages, trenchless drain and sewer line replacements to limit property disruption, tree root removal from pipes, and backflow prevention with testing to protect water quality.

The company provides free estimates for new heating and cooling system installations. Club memberships offer maintenance plans that include scheduled inspections for plumbing and HVAC systems, priority appointment scheduling, and discounts on repairs.

A one-year warranty covers parts and labor for completed work. Pricing features upfront quotes to specify costs prior to commencing any job.

Customer reviews document experiences with the plumber and related services. One review detailed a water heater replacement, installation of a main shut-off valve, and plumbing adjustments during a kitchen renovation, noting the use of quality parts and thorough explanations. Another described a pipe repair with process explanations and advice provided. Feedback on heating inspections mentioned detailed component reviews and monitoring suggestions.

Alpha Plumbing, Heating & Cooling serves the Twin Cities metropolitan area, including Bloomington, St. Paul, Minneapolis, Woodbury, Plymouth, Eden Prairie, White Bear Lake, Stillwater, Edina, Brooklyn Park, Burnsville, Eagan, Apple Valley, Fridley, Coon Rapids, Roseville, Lakeville, Minnetonka, Shakopee, and Anoka.

"The licensed plumber plays a central role in ensuring plumbing work meets safety and efficiency standards," said Chad Olson, owner of Plumber at Alpha Plumbing, Heating & Cooling. "Handling diverse tasks from installations to emergencies requires precise knowledge of systems and codes."

"Experienced plumbers use tools like camera inspections and hydro-jetting to diagnose and resolve issues effectively," continued Olson. "This allows for targeted solutions that address root causes."

The company operates as a locally owned and independent business, focusing on residential services in plumbing, heating, cooling, gas, and drains. Technicians, including the plumber, maintain licensing and training to perform work across these areas. Alpha Plumbing, Heating & Cooling delivers these services to support a reliable home infrastructure.
