Control Point Heating ? Cooling ? Plumbing ? Electric Assists Homeowners With the MASS Save Heat Program

March 31, 2026

SHREWSBURY, MA - March 31, 2026 -
Control Point Heating ? Cooling ? Plumbing ? Electric assists homeowners in pursuing energy-efficient home improvements through the MASS Save Heat program. The company provides guidance and installation services for qualifying upgrades to heating, cooling, and water heating systems.

The MASS Save Heat program enables eligible homeowners to obtain zero percent interest loans of up to twenty-five thousand dollars with repayment terms extending up to seven years. Participants typically begin with a Home Energy Assessment to identify suitable measures. This financing structure can be combined with rebates and federal incentives to reduce the overall investment in system enhancements.

As a member of the Heat Pump Leaders Network, Control Point Heating ? Cooling ? Plumbing ? Electric applies qualifying rebates directly as instant credits at the time of project completion. Its Residential Concierge team coordinates documentation and loan applications to support a streamlined process from initial evaluation through final installation.

Control Point Heating ? Cooling ? Plumbing ? Electric offers installation, repair, and maintenance for heat pumps, geothermal heat pumps, ductless systems, gas furnaces, and boilers. These systems represent common upgrades supported under the program. The company also addresses related plumbing requirements, such as water heater replacements and electrical work needed for proper system integration. Zone control systems and home automation features can be added to optimize performance across different areas of a property.

Founded in 2007 by Nick Lupo, the business operates as a family-owned provider of heating, cooling, plumbing, and electrical services. In January 2023, Danielle Boland joined as co-owner and Director of Strategy and Business Operations, bringing extensive experience in business leadership and customer experience management. The technician team possesses more than 286 years of combined industry knowledge.

Danielle Boland, Co-Owner and Director of Strategy and Business Operations, said, "Our team works to ensure homeowners receive coordinated support when exploring options for system improvements that align with available resources."

Nick Lupo, Co-Owner, added, "Accessing programs that facilitate efficient upgrades has remained central to delivering practical solutions for clients since the company began."

The firm holds EPA certification and maintains full licensing and insurance. Its operations reflect core values of accountability, initiative, solution-oriented thinking, customer satisfaction, and employee wellness. These principles guide project execution and internal practices.

Additional services include duct cleaning, indoor air quality improvements, sheet metal fabrication, and custom ductwork. These offerings help maximize the efficiency of newly installed heating and cooling equipment. The company also provides full plumbing solutions such as pipe repairs, sewer line work, water filtration systems, and backflow prevention. Electrical services cover panel upgrades, repairs, and safety inspections that complement HVAC projects.

The Control Point VIP Club membership program delivers scheduled maintenance visits that include inspections, cleaning, and adjustments. Such ongoing care supports sustained energy performance and reduces the likelihood of unexpected repairs. Transparent pricing and a satisfaction guarantee are standard elements of installation work.

Commercial properties receive the same professional standards applied to residential projects. Technicians handle both small and large-scale initiatives with emphasis on code compliance and workmanship quality. Regular training keeps staff current with evolving technologies and program requirements.

Environmental responsibility informs many recommendations. The selection of high-efficiency equipment and careful installation practices contribute to lower energy consumption. Assistance with program documentation helps align projects with efficiency objectives.

Control Point Heating ? Cooling ? Plumbing ? Electric continues to adapt its capabilities to advancements in energy-efficient technologies. The integration of precise controls enhances the functionality of modern systems. Through consistent support for participants in the MASS Save Heat program, the company aids homeowners in achieving reliable and efficient home environments.

The family-owned structure underscores a long-standing dedication to professional service and community needs. Leadership has reinforced operational focus on excellence across all service areas.

Control Point Heating ? Cooling ? Plumbing ? Electric is a family-owned business founded in 2007 specializing in HVAC, plumbing, and electrical services. With extensive team experience, the company delivers comprehensive solutions focused on efficiency and satisfaction.
