

Northwest Plumbing Heating & AC Expands Winter Heater Installation and Repair Programs for Quad Cities Residents

April 03, 2026

DAVENPORT, Iowa - April 03, 2026 -
Northwest Plumbing Heating & AC has expanded its winter service programs to address increased demand for heating system support across the Quad Cities area. The company, which has served Iowa and Illinois communities since 1923, has introduced enhanced diagnostic procedures and flexible scheduling options to help homeowners maintain reliable heating throughout the coldest months of the year.

The expanded programs respond to growing concerns about heating system reliability as temperatures continue to drop across the region. The company now offers comprehensive maintenance packages that include detailed system inspections, preventative repairs, and priority service scheduling for both heating and plumbing services.

"With nearly a century of experience serving the Quad Cities, we understand how critical reliable heating is during Iowa winters," said Bill Durand, Service Manager at Northwest Plumbing Heating & AC. "Our

expanded programs help homeowners avoid emergency breakdowns while improving system efficiency and reducing energy costs throughout the winter months."

The company's Service Partner Agreements, starting at $99 annually, provide scheduled maintenance visits, priority service scheduling, and waived after-hours fees. These preventative maintenance plans cover furnace systems, boilers, geothermal heating, and high-efficiency equipment. The expanded program also includes enhanced plumbing services coverage, recognizing that frozen pipes and water heater failures often coincide with extreme winter weather.

According to a recent news article published by industry analysts, heating system failures increase by 40 percent during the first cold snap of winter, primarily affecting units that have not received regular maintenance. The company's enhanced diagnostic procedures aim to identify potential issues before they result in system failures.

The expansion includes updated training protocols for technicians on the latest high-efficiency heating systems and smart home integration technologies. The company maintains a 4.8 out of 5.0 rating on its Google Business Profile from over 600 customer reviews, reflecting its commitment to quality service delivery.

Customers can stay informed about service updates and seasonal maintenance reminders through the company's social media channels, including Twitter, where the company regularly shares heating system maintenance tips and weather-related service advisories.

The family-owned business operates from its Davenport headquarters, providing comprehensive heating, cooling, and plumbing solutions throughout the region. Services include water heater installation and repair, drain cleaning, sewer repair, fixture replacements, and sump pump installations. The company offers 24-hour emergency service and financing options through GreenSky® to help customers manage unexpected repair costs.

Northwest Plumbing Heating & AC continues to adapt its service offerings to meet evolving customer needs while maintaining the personalized service approach that has characterized the company for 100 years. The expanded winter programs represent the company's ongoing commitment to ensuring Quad Cities residents have access to reliable, efficient heating solutions when they need them most.
