

USEReady and Elementum Partner to Accelerate Agentic Automation Across Finance, Procurement, and Operations

April 07, 2026

PRINCETON, NJ - April 07, 2026 -

Partnership to be showcased at Exclusive Breakfast with Agents Event at Harvard Club, New York City, April 16, 2026.

USEReady, a global provider of AI and analytics modernization solutions, today announced a strategic partnership with Elementum, the open orchestration platform for enterprise AI workflows, to accelerate enterprise adoption of Agentic Automation. USEReady will integrate its AlphaGenie Agentic Automation Bundle with Elementum's no-data-movement workflow capabilities, enabling enterprises to design, deploy, and scale reasoning-driven AI agents directly inside their existing data environments.

The partnership brings together three complementary strengths: a secure, scalable cloud data foundation; Elementum's open workflow and process orchestration layer; and AlphaGenie, USEReady's proprietary suite of pre-configured cognitive and agentic AI agents tailored for specific industries and business functions. Together, they enable enterprises to automate complex, cross-functional processes without disrupting existing data architectures or replacing core systems.

The initiative establishes a unified foundation for enterprises looking to move beyond dashboards and rule-based automation toward cognitive, goal-oriented agents that reason, adapt, and act within governed data ecosystems ? with measurable ROI within 90 days.

?Our customers want automation that thinks, not just executes. By combining AlphaGenie?s agentic intelligence with Elementum?s open orchestration, we are enabling enterprises to automate reasoning itself. This partnership represents the evolution from data to decision to autonomous action ? all within a secure, compliant environment,? said Uday Hegde, Co-Founder & CEO, USEReady.

Each AlphaGenie agent is pre-trained for specific business functions. Built on USEReady?s ART (Accurate, Responsible, Trustworthy) principle, the agents ensure automation is not only intelligent but also explainable, compliant, and auditable. Early customer engagements have demonstrated 3?5x faster decision-making, 25?40% higher throughput, 15?30% cost reduction, and 100% auditable execution across enterprise operations.

?Enterprises don?t need more AI. They need AI that actually works inside the systems they already run ? without moving data, without burning tokens, without a 12-month implementation. USEReady gets that. Our partnership is built on this shared conviction,? commented Jeremy Walsh, Global Head of Strategic Enablement & Partners, Elementum.

The partnership will be showcased at ?Breakfast with Agents: Explore the Future of AI-Powered Finance, Procurement & Operations,? an exclusive, invite-only session co-hosted by USEReady and Elementum on April 16, 2026 at the Harvard Club?s Mahogany Room in New York City.

The session will feature live demonstrations across enterprise use cases in Finance, Procurement, and Operations ? including intelligent F&A intake automation, frictionless vendor onboarding, contract intelligence, and software and license optimization. Designed for CFOs, Finance Operations leaders, Procurement heads, Compliance and Risk executives, and COOs, it is part of USEReady?s ongoing Breakfast with Agents series, which regularly convenes senior practitioners to examine how agentic AI is reshaping enterprise operations.

?The Harvard Club session is where we bring agentic intelligence and open orchestration together in front of the leaders who need them most. Our goal is to move the conversation from ?what is agentic AI? to ?here is what it does in your workflows, today?,? said Lalit Bakshi, Co-Founder & President, USEReady.

Finance, Procurement and Operations leaders interested in attending the April 16 session at the Harvard Club can request an invitation at:

About Elementum

Elementum is the open orchestration platform for enterprise AI workflows. Its patented Zero Persistence architecture runs natively inside your data cloud ? enabling instant automation without data movement, replication, or vendor lock-in. Fully pre-integrated with leading AI, ML, and LLM providers, Elementum combines AI reasoning, human approvals, and deterministic policy rules in a single orchestration layer. Industry leaders including Sanofi, Under Armour, and Snowflake use Elementum to transform operations and increase productivity. Elementum meets SOC 2 Type II and ISO 27001 standards, with Concept to Production in under 30 days. Learn more at elementum.ai.

About USEReady

Founded in 2011 in New York, USEReady empowers enterprises with cutting-edge AI and Data Analytics solutions to drive intelligent, autonomous transformation. As a trusted partner to Fortune 500 organizations, USEReady delivers scalable, high-impact solutions through its expertise in Agentic AI, Decision Intelligence, Cloud Data Engineering, and Analytics Modernization. Leveraging proprietary frameworks, platforms and accelerators, along with industry protocols, USEReady enables customers across Manufacturing, Financial Services, Healthcare, Retail, Energy, Travel & Hospitality and Public Sector to achieve measurable outcomes in an agentic world.
