Crown Plumbing & Water Damage Restoration Announces Annual Disaster Relief Support Program for San Antonio Families

April 02, 2026

SAN ANTONIO, TX - April 02, 2026 -

Crown Plumbing & Water Damage Restoration has announced the launch of its annual disaster relief support program, providing comprehensive restoration and plumbing assistance to families significantly impacted by fire or major disasters in the San Antonio area. The initiative reflects the company's commitment to supporting the local community during times of crisis.

The program will provide selected families with complete restoration services, including fire damage restoration, water damage restoration, mold remediation, and essential plumbing repairs at no cost. The company's recent expansion of services and locations enables them to respond more effectively to disaster situations throughout the region.

"When disaster strikes a family, the path to recovery can feel overwhelming," said Jeremy Newman, Director of Operations at Crown Plumbing & Water Damage Restoration. "Through this program, we aim to ease that burden by providing comprehensive restoration services that address both immediate plumbing emergencies and the resulting structural damage. Having both capabilities under one roof means families can

work with a single trusted partner throughout the entire recovery process."

The company's expansion includes new locations on George Road in San Antonio and in Selma, Texas, strengthening its ability to provide rapid emergency response throughout the greater San Antonio metropolitan area. These strategic locations complement the company's existing 24/7 emergency service capabilities.

The disaster relief program builds upon the company's integrated approach to restoration and plumbing services. When water damage occurs from plumbing failures, the company can address both the initial leak and resulting structural damage, eliminating the need for homeowners to coordinate between multiple contractors. This comprehensive approach extends to sewage cleanup, mold remediation, and complete home reconstruction when necessary.

Selection criteria for the annual program include families facing significant financial hardship due to disaster-related damage, those without adequate insurance coverage, and situations where children or elderly family members are displaced from their homes. Applications will be reviewed by a committee that includes company leadership and community partners.

The initiative comes at a time when extreme weather events and aging infrastructure have increased the frequency of home disasters requiring both plumbing and restoration services. The company's dual expertise in these areas positions them to address the full scope of disaster recovery needs.

Crown Plumbing & Water Damage Restoration provides comprehensive plumbing and restoration services throughout San Antonio and surrounding areas. The company specializes in emergency plumbing repairs, water damage restoration, fire damage restoration, mold remediation, and complete home reconstruction. Their services encompass everything from routine plumbing maintenance and water heater installation to complex restoration projects involving asbestos removal, sewage cleanup, and structural repairs. The company maintains a team of certified technicians available for 24/7 emergency response, serving both residential and commercial clients throughout South Texas.
