

Dixie Glass Lucedale Responds to Growing Demand for Professional Glass Services Across Mississippi Gulf Coast

April 06, 2026

LUCEDALE, MS - April 06, 2026 -
Dixie Glass in Lucedale continues to meet increasing regional demand for comprehensive glass services as residential and commercial development accelerates across the Mississippi Gulf Coast. The three-generation family business, which has served the region since 1946, reports steady growth in service requests for auto glass replacement, custom residential installations, and commercial glass projects throughout 2026.

The company attributes the increased demand to several factors, including population growth along the Gulf Coast, aging commercial infrastructure requiring updates, and heightened awareness of Advanced Driver Assistance Systems (ADAS) recalibration needs following windshield replacements. As one of the few providers offering in-house ADAS recalibration services in the region, the company has positioned itself as an essential service provider for modern vehicle safety requirements.

"The glass services industry has evolved significantly over the past decade, particularly with the integration of

advanced safety systems in vehicles," said Sean Westmoreland, Owner and Operator at Dixie Glass. "Our investment in ADAS recalibration technology and certified technician training ensures that when customers need windshield replacement, their vehicle safety systems continue functioning properly. This comprehensive approach to auto glass service has become increasingly important as more vehicles rely on these systems."

The company's growth extends beyond automotive services. Residential customers increasingly request custom frameless shower enclosures and energy-efficient window replacements, while commercial clients seek storefront renovations and curtain wall system installations. The company's ability to handle projects ranging from small custom glass cutting to large commercial contracts has established it as a versatile provider in the regional market.

Recent industry recognition underscores the company's market position. Dixie Glass earned inclusion on the Inc. 5000 list of Fastest Growing Small Businesses in both 2020 and 2023, received the Glazier Nation Glass Company of the Year award for 2024, and was honored with the 2025 WXXV Viewers' Choice Award. These accolades reflect the company's commitment to maintaining high service standards while expanding its capabilities.

The company maintains Auto Glass Safety Council (AGSC) Certified Technicians on staff and holds Mississippi State Board Certified Contractor status, ensuring compliance with industry standards and state regulations. Direct insurance billing capabilities streamline the claims process for customers requiring auto glass replacement, removing administrative barriers to essential repairs.

As development continues along the Mississippi Gulf Coast, the demand for professional glass services shows no signs of slowing. The company's comprehensive service offerings, from decorative glass installations to emergency commercial door repairs, position it to serve diverse customer needs across multiple sectors.

Dixie Glass Lucedale operates as a full-service glass provider offering auto glass replacement and repair, residential glass solutions including custom shower enclosures and mirrors, commercial glass services for storefronts and large-scale projects, and custom glass fabrication services. The family-owned business has maintained operations on the Mississippi Gulf Coast for three generations, combining traditional craftsmanship with modern technology to serve residential and commercial customers throughout the region.
