# Right Meow Dumpsters Expands Service Area Across King and Pierce Counties

*April 23, 2026*

RENTON, WA - April 23, 2026 -
Right Meow Dumpsters, a dumpster rental company serving the greater Seattle area, has announced an expansion of its service territory to include additional communities across King County and Pierce County. The company, which offers residential, commercial, construction, and industrial container rentals, stated that the expansion reflects growing demand for flexible, short-term waste removal solutions throughout the region. Customers in newly added service areas can now book directly through the company's website and expect the same delivery responsiveness that has defined the company's operations since it recently launched.

"We started this company because we saw a real gap in how dumpster rental was being handled in this part of Washington," said Scotty Tymczyszyn, owner of Right Meow Dumpsters. "A lot of customers were dealing with long wait times and rigid scheduling, and we wanted to offer something more flexible and straightforward for homeowners and contractors alike." Tymczyszyn noted that the expansion into additional King County and Pierce County communities was a natural next step as order volume increased and the company's operational capacity grew to support a wider delivery footprint across the Puget Sound region.

Right Meow Dumpsters currently offers 15, 20, 30, and 40-yard containers, making the company's inventory

suited for a broad range of project types and customer needs. Residential customers have utilized the company's containers for home cleanouts, landscaping debris, and renovation projects, while commercial and construction accounts have drawn on the larger 30 and 40-yard units for demolition material, framing waste, and jobsite debris management. The company also serves industrial customers, a capability that distinguishes its offerings from smaller operators that focus exclusively on residential roll-off rentals in the area.

Yard waste removal, concrete disposal, recycling-focused containers, and storm cleanup services are among the additional categories Right Meow Dumpsters has made available to customers across its service territory. The company operates seven days a week from 7 a.m. to 7 p.m., a schedule designed to accommodate contractors and homeowners who require weekend delivery or pickup windows. According to the company, consistent availability across all seven days has been a frequently cited factor among customers who return for repeat rentals on ongoing projects, particularly those managing multi-phase construction and renovation timelines.

The expanded service area now encompasses communities including Seattle, Renton, Bellevue, Kent, Federal Way, Auburn, Puyallup, Lakewood, and Tacoma, positioning Right Meow Dumpsters as a provider with coverage across a substantial portion of the Puget Sound region's residential and commercial corridor. The company stated that customers in all served communities have access to the same container inventory and delivery windows, without surcharges or service restrictions based on location within the coverage area. Prospective customers can confirm availability for their specific address through the company's website before placing an order.

Right Meow Dumpsters has also noted that its container inventory is suited for weather-related cleanup projects, which are a recurring need in the Pacific Northwest given the region's seasonal storm activity and the debris removal demands that follow significant wind and rain events. The company stated that storm cleanup container requests have been a consistent part of its order mix and that its seven-day availability ensures customers can secure a unit quickly when urgent removal needs arise following severe weather.

Demand for roll-off dumpster rental services in the Seattle metropolitan area has remained steady as ongoing residential development, commercial construction, and storm-related debris removal continue to generate consistent need for short-term container solutions. Right Meow Dumpsters has indicated that further additions to its dumpster rental fleet and potential expansion of its service footprint remain under consideration as the company evaluates market conditions in surrounding counties. The company accepts new orders through its website seven days a week.
