

Tampa Florida Based Audio Visual Installer Completes Installation of A Large Video Wall

April 11, 2016

Tampa, Florida - April 11, 2016 -
Tampa Florida based The Pro Media Group provides professional audio visual solutions announces the completion of a floating video wall for a local hospital.

Video walls in conventions, airports and other prominent venues are breathtaking. The ProMedia Group has taken this advancement to the next level as they have come to provide ?floating? video walls. For any big events such as exhibits, product launches, conventions and event meetings, The ProMedia Group is increasingly waving the popularity banner of being one of today?s hottest providers of floating video wall in the southeast.

Video walls, which recently came to life as one of the amazing products of technological advancement, is a special multi-monitor setup which is composed of multiple video projectors, television sets or computer monitors tiled together in order to form a single, large screen.

Typical display technologies include Direct View LED arrays, LCD panels, rear projection cubes, Laser Phosphor Displays and blended projection screens. The main reasons of developing and using video wall

instead of a single big screen are the ability to tailor tile layouts and greater pixel density for every unit cost due to the economics of producing single screens which are different in size, shape or resolution.

In addition to stadiums, control rooms, and other large venues, video walls are now incorporated in clinics and hospitals. In fact, the Florida hospital challenged The ProMedia Group to get them a 3x3 video wall inside their waiting room. The location should be in front of the window and so a freestanding solution was necessary.

The challenge was earnestly taken by The ProMedia Group (PMG) and, as a solution, modified the LVM3X3U to float the displays in front of the window. For stable placement, PMG modified the mount using Chief accessories that are durable and built-to-last. The result: All were blown way with PMG?s floating LED video wall. Everyone in the clinic could not help but to be amazed by this media solution provider, who exceeded their expectations to the highest level. The Client was happy and Chief Mfg. was impressed.
