

Northwest Plumbing Heating & AC Announces Winter Repair Services and Monthly Savings Program

April 13, 2026

DAVENPORT, Iowa - April 13, 2026 -
Northwest Plumbing Heating & AC has announced expanded winter service capabilities and monthly promotional offerings to help Quad Cities residents maintain their home comfort systems during the coldest months of the year. The company, which has served the region since 1923, is responding to increased demand for comprehensive heating and plumbing solutions as temperatures continue to drop across Iowa.

The enhanced winter service program includes specialized diagnostic procedures, flexible scheduling options, and preventative maintenance packages designed to address the unique challenges homeowners face during colder months. With frozen pipes and heating system failures representing the most common winter emergencies, the company has implemented new protocols to help residents avoid costly repairs.

"Winter places extraordinary demands on both heating and plumbing systems, and we're seeing more homeowners recognize the value of preventative maintenance," said Bill Durand, Service Manager at Northwest Plumbing Heating & AC. "Our expanded winter services and Deal of the Month promotions

make it more affordable for families to protect their homes from temperature-related damage while maintaining comfortable indoor environments."

The company's winter service expansion comes as industry data shows homes with combined heating and plumbing maintenance programs experience 40 percent fewer emergency service calls during winter months. Regular HVAC inspections can also reduce energy costs by up to 20 percent while extending equipment life by several years.

Northwest Plumbing Heating & AC offers Service Partner Agreements starting at $99 annually for heating systems and $119.40 for plumbing services. These agreements include scheduled maintenance visits, priority service scheduling, and waived after-hours fees for emergency situations. The company's technicians utilize advanced diagnostic equipment to perform thorough system evaluations, identifying efficiency issues and potential failure points before they become costly emergencies.

The timing of this service expansion aligns with the company's broader digital initiative to provide educational resources across multiple platforms. Through enhanced website content and social media channels, including Pinterest, the company shares practical heating system maintenance guidance and plumbing winterization tips. This news article highlights how the company is adapting to meet evolving customer needs while maintaining its commitment to both preventive maintenance and responsive repair services.

Monthly specials and seasonal promotions provide additional value for customers seeking to upgrade or maintain their home comfort systems. The company maintains 24-hour emergency service availability alongside its educational and preventative maintenance initiatives.

Northwest Plumbing Heating & AC has maintained a 4.8 out of 5.0 rating on its Google Business Profile from over 600 customer reviews. The company provides free estimates for system replacements and offers financing options through GreenSky® to make necessary repairs and upgrades more accessible to homeowners.

Founded in 1923, Northwest Plumbing Heating & AC specializes in residential plumbing, heating, and cooling services throughout the Quad Cities area. The locally owned company provides installation, repair, and maintenance services for all major heating and cooling systems, as well as comprehensive plumbing solutions.
