

Go Industries Expands Custom Manufacturing and Fabrication Capabilities for Growing OEM Market

April 20, 2026

Richardson, TX - April 20, 2026 -
Go Industries Inc., a Texas-based manufacturer with over four decades of experience, today announced the expansion of its custom manufacturing and fabrication services to meet increasing demand from original equipment manufacturers across multiple industrial sectors. The expansion includes enhanced precision manufacturing capabilities specifically designed for AI data center infrastructure and comprehensive tube and sheet metal processing services.

The company has significantly upgraded its production capabilities in response to growing requirements from OEM partners in automotive, telecommunications, medical equipment, defense, and emerging technology infrastructure markets. The expansion positions Go Industries to serve the rapidly evolving needs of manufacturers requiring specialized fabrication solutions with competitive pricing and rapid turnaround times.

"The demand for precision custom manufacturing has accelerated dramatically, particularly in technology infrastructure sectors," said a Go Industries spokesperson. "Our expanded capabilities allow us to deliver

comprehensive fabrication solutions from initial design through final delivery, all from our Texas facilities. This integrated approach ensures quality control and enables us to meet the tight deadlines our OEM partners require."

The enhanced service offerings now include precision manufacturing for AI data center server racks, addressing the critical infrastructure needs of the expanding technology sector. Tube processing capabilities encompass CNC bending, rolling, end forming, and sawing operations. Sheet metal services have been expanded to include bending, shearing, notching, punching, robotic welding, laser cutting, and plasma cutting.

Additional specialized services include certified welding to D1.1, B31.1, and B31.3 standards, chrome plating, powder coating, pipe profiling, and complete assembly and packaging solutions. The company maintains design and engineering support teams to assist OEM partners in optimizing products for manufacturability and cost-effectiveness.

Go Industries serves diverse industrial sectors including automotive manufacturers, cable and wire producers, commercial equipment manufacturers, emergency equipment providers, defense contractors, Department of Transportation suppliers, gas and oil companies, medical equipment producers, public safety divisions, sports and fitness equipment manufacturers, transportation safety equipment suppliers, and telecommunications companies.

The company operates from state-of-the-art facilities in Texas, utilizing advanced equipment including a high-capacity powder coating line and batch oven for product finishing. An extensive inventory of tooling and machinery enables cost-effective production solutions across varying order volumes, from prototype development to large-scale manufacturing runs.

Private label programs offered by the company enable businesses to develop and launch branded products without investing in manufacturing infrastructure. These programs include comprehensive support from initial design through final delivery, allowing companies to bring products to market efficiently.

Established in 1978, Go Industries originally manufactured truck accessories and law enforcement equipment before expanding into custom OEM manufacturing services. The company holds Platinum Status with SEMA, reflecting its commitment to quality and innovation in manufacturing. As a division of Longhorn Reels, Go Industries combines specialized manufacturing expertise with broader industrial capabilities to serve diverse market segments throughout North America.
