

Keathley Landscaping Expands Sod Installation and Drainage Service Capabilities in North Texas

April 17, 2026

GARLAND, TX - April 17, 2026 -
Keathley Landscaping, a Dallas-based landscaping company serving the North Texas region since 2002, announces expanded capabilities in specialized sod installation and drainage correction services to address increasing demand from property owners facing lawn transformation and water management challenges.

The company has enhanced its service offerings to provide comprehensive solutions that combine professional Lucas sod installation expertise with advanced drainage systems, addressing two critical aspects of lawn health that are particularly important in North Texas. The region's clay soil conditions and variable rainfall patterns create unique landscaping challenges that require specialized knowledge and proven methodologies.

"Property owners throughout North Texas face distinct challenges when it comes to maintaining healthy, sustainable lawns," said Logan Keathley, founder and NDS Certified Drainage Contractor at Keathley Landscaping. "By combining our sod installation expertise with advanced drainage solutions, we help

homeowners achieve the lush, green lawns they desire while preventing costly water damage to their properties."

The company's sod installation process begins with removing existing plant material and properly preparing the soil foundation. The team carefully grades the area before laying fresh sod, ensuring proper root-to-soil contact for optimal establishment. Depending on property size, complete lawn transformations typically take between one and three days. The company offers multiple grass varieties suited to North Texas conditions, including St. Augustine, Zoysia, Bermuda, and Tall Fescue, each providing different benefits regarding shade tolerance, drought resistance, and maintenance requirements.

Regarding drainage solutions, the company specializes in diagnosing and correcting complex water management problems that can damage foundations, create mosquito breeding grounds, and destroy landscaping investments. As an NDS Certified Drainage Contractor, the company incorporates industry-standard products and methodologies in all drainage installations, from French drain systems and strategic grading to custom-designed buried drainage pipeline systems.

"Proper drainage is essential for maintaining a healthy lawn and protecting property investments," noted Keathley. "Many homeowners don't realize that lawn drain issues can result in costly damage that isn't covered by standard homeowners' insurance. Our team provides practical, budget-conscious solutions tailored to each property's unique requirements."

The expanded service capabilities come as North Texas continues to experience rapid residential growth and property owners increasingly seek professional solutions for outdoor living spaces. The company's dual specialization in sod installation and drainage correction positions it to address comprehensive lawn health needs through a single service provider.

Beyond sod and drainage services, Keathley Landscaping provides comprehensive outdoor living solutions including landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, fence repair and installation, patio covers, outdoor kitchens, and fire pits. The company also offers tree trimming and large tree removal services.

Keathley Landscaping serves residential and commercial properties throughout the Dallas-Fort Worth area, including Dallas, Garland, Wylie, Plano, Lucas, and surrounding communities. The company maintains a reputation for combining technical expertise with practical solutions, helping property owners achieve and maintain attractive, functional outdoor spaces that enhance property values and quality of life.
