

Keathley Landscaping Expands Yard Drainage Solutions and Professional Sod Installation Services in North Texas

April 27, 2026

GARLAND, TX - April 27, 2026 -
Keathley Landscaping, a Dallas-based landscaping company serving North Texas since 2002, announces expanded capacity for comprehensive yard drainage solutions and professional sod installation services to meet growing demand from property owners facing water management challenges and lawn transformation needs.

The expansion comes as North Texas homeowners increasingly seek professional solutions for complex drainage problems that threaten property foundations and landscaping investments. As an NDS Certified Drainage Contractor, the company specializes in diagnosing and correcting water management issues that can lead to flooding, foundation damage, and mosquito breeding grounds.

"Property owners often underestimate the damage that poor yard drainage Rockwall residents experience until they face foundation problems or landscape deterioration," said Logan Keathley, founder and NDS

Certified Drainage Contractor at Keathley Landscaping. "Our expanded services address these critical issues through custom-designed drainage systems, from French drains and grading to large-scale buried drainage pipelines that provide permanent solutions."

The company's drainage expertise addresses the unique challenges of North Texas clay soil conditions and variable rainfall patterns. Each drainage solution begins with comprehensive site assessment to identify water flow patterns, problem areas, and optimal correction strategies. The team then implements industry-standard products and methodologies to create effective water management systems that protect both structures and landscapes.

Complementing its drainage services, Keathley Landscaping offers complete sod installation service that transforms properties within one to three days, depending on property size. The installation process involves removing existing plant material, preparing the soil foundation, grading the area for proper drainage, and carefully laying fresh sod to create immediate lawn transformation.

The company stocks multiple grass varieties suited to North Texas conditions, including St. Augustine, Zoysia, Bermuda, and Tall Fescue. Each variety offers specific benefits for different sun exposures, traffic patterns, and maintenance preferences. The selection process considers factors such as shade tolerance, drought resistance, and seasonal performance to ensure long-term lawn success.

"A healthy lawn starts with proper installation and drainage," noted Keathley. "When homeowners invest in quality sod combined with effective drainage systems, they create outdoor spaces that maintain their beauty and value through all weather conditions."

Beyond drainage and sod services, the company provides comprehensive outdoor living solutions including landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, fence repair and installation, patio covers, outdoor kitchens, and fire pits. The company also offers tree trimming and large tree removal services.

Keathley Landscaping serves residential and commercial properties throughout the Dallas-Fort Worth area, including Dallas, Garland, Wylie, Plano, Lucas, and surrounding communities. The company maintains its commitment to providing practical, cost-effective solutions that address both immediate concerns and long-term property value.

Established in 2002, Keathley Landscaping has built its reputation on solving complex landscaping challenges through innovative approaches and professional expertise. The company combines technical

knowledge with practical experience to deliver landscaping solutions that enhance property aesthetics while addressing functional requirements.
