

Wild Range Associates Announces Expanded Bookkeeping Services for Missouri Businesses Preparing for 2025 Tax Season

April 29, 2026

WEBB CITY, MO - April 29, 2026 -
Wild Range Associates, a professional bookkeeping firm serving Southwest Missouri, announces the expansion of its comprehensive financial management services as businesses begin preparing for the upcoming 2025 tax season. The firm has enhanced its service offerings to address the growing complexity of tax compliance and financial record-keeping requirements facing small businesses throughout the region.

The expanded services come as many businesses struggle with increasingly complex tax regulations and documentation requirements. Recent industry data shows that nearly 40 percent of small businesses spend over 80 hours annually on federal tax preparation alone, with many facing penalties due to incomplete or inaccurate financial records.

Wild Range Bookkeeping provides systematic financial record management that helps businesses maintain organized documentation throughout the year. The firm's services encompass comprehensive bookkeeping,

tax planning, tax preparation, and specialized tax cleanup services for businesses with incomplete financial records. Each service utilizes industry-standard double-entry accounting systems to ensure accuracy and compliance.

"Small business owners often discover gaps in their financial documentation only when tax deadlines approach," said Weston Rea, founder of Wild Range Associates. "By implementing professional bookkeeping practices throughout the year, businesses can avoid the stress of last-minute scrambling while gaining valuable insights into their financial health that support better decision-making."

The firm's approach addresses common challenges that businesses face during tax season, including unreconciled accounts, missing receipts, and unclear deduction documentation. Through systematic tracking and monthly reconciliation processes, Wild Range Professional Bookkepping helps businesses maintain audit-ready records that simplify tax filing and maximize legitimate deductions.

Beyond basic bookkeeping, the firm offers proactive tax planning services that help businesses anticipate and prepare for tax obligations well before filing deadlines. This forward-looking approach allows business owners to make strategic financial decisions with a clear understanding of their tax implications.

The tax cleanup service has proven particularly valuable for businesses that have fallen behind on their financial record-keeping. Rather than attempting to reconstruct months or years of financial data during tax season, businesses can work with the firm to organize and reconcile their records systematically, creating a solid foundation for future financial management.

"We see many businesses that have grown beyond their initial bookkeeping systems but haven't yet implemented professional financial management practices," added Rea. "Our goal is to bridge that gap with affordable, reliable services that give business owners confidence in their financial records while freeing them to focus on growth and operations."

Wild Range Associates has served the Southwest Missouri business community since 2018, providing bookkeeping and financial management services to small businesses and nonprofit organizations throughout Jasper County, Newton County, and surrounding areas. The firm specializes in helping organizations increase profitability and cash flow through systematic accounting practices and strategic financial planning. With a focus on accuracy and reliability, the company has established itself as a trusted partner for businesses seeking to streamline their financial operations and ensure tax compliance.
