

Williams and Sons Custom Construction and Design Expands Services for New Home Construction in Jenkins Missouri

May 04, 2026

CASSVILLE, MO - May 04, 2026 -
Williams and Sons Custom Construction and Design has expanded its service offerings to provide comprehensive new construction and home addition services throughout Southwest Missouri, including the Jenkins area. The family-owned construction company, which has built custom homes for over 50 years, now offers enhanced design-build capabilities and expanded renovation services to meet growing demand for both new homes and major home improvements in the region.

The expansion allows Williams and Sons New Construction to serve clients seeking everything from ground-up custom homes to significant additions that transform existing properties. The company's enhanced services include in-house design consultation, complete project management from permits through final inspection, and dedicated oversight of all construction phases including foundation work, framing, roofing, and mechanical installations.

"We recognized that homeowners in our region need more flexible options when it comes to their living spaces," said Trevor, a company representative from Williams and Sons Custom Construction and Design. "Some clients want to build their dream home from scratch, while others prefer to expand and improve their current properties. Our expanded services ensure we can meet both needs with the same attention to detail and craftsmanship that has defined our work for decades."

For new construction projects, the company manages all aspects of development, from site preparation and foundation work to final interior finishes. The team coordinates with local authorities for necessary permits and inspections while maintaining consistent quality standards across all trades involved in the construction process. Home addition projects receive the same comprehensive attention, with careful integration of new spaces into existing structures to ensure seamless transitions and structural integrity.

The company's approach emphasizes clear communication throughout the building process, maintaining clean job sites, and adhering to project timelines. Williams and Sons Local Builders work directly with clients from initial consultation through project completion, providing regular updates and ensuring that every detail aligns with the client's vision. The in-house design services allow for real-time blueprint modifications and customization options that reflect each family's unique requirements.

The expansion comes as Southwest Missouri experiences continued residential growth, with many families seeking quality construction services for both new homes and property improvements. The company's established presence in communities including Monett, Golden, Eagle Rock, Shell Knob, Cassville, and now enhanced coverage in the Jenkins area positions them to serve a broader client base while maintaining their commitment to personalized service.

Williams and Sons Custom Construction and Design operates as a full-service construction company specializing in custom homes, new construction, and home additions throughout Southwest Missouri. The family-owned business combines traditional craftsmanship with modern building techniques to create homes that reflect each client's unique vision and lifestyle needs. With over five decades of experience in residential construction, the company has established a reputation for quality workmanship, reliable project management, and transparent communication throughout the building process.
