

Northwest Plumbing Heating & AC Expands Furnace Repair Services for Winter Season

April 17, 2026

DAVENPORT, Iowa - April 17, 2026 -
Northwest Plumbing Heating & AC has expanded its winter service capabilities to address increased demand for heating system repairs and maintenance across the Quad Cities area. The company, which has served Iowa residents since 1923, reports a significant uptick in service calls as temperatures continue to drop throughout the region.

The expanded service program introduces enhanced diagnostic procedures and flexible scheduling options designed to help homeowners avoid heating system failures during the coldest months of the year. The company has implemented new protocols specifically targeting the prevention of frozen pipes and furnace breakdowns, which represent the most common winter emergencies faced by area residents.

"Winter heating failures can leave families in dangerous situations, especially when temperatures drop below freezing," said Bill Durand, Service Manager at Northwest Plumbing Heating & AC. "Our expanded service capacity ensures we can respond quickly to emergency calls while also helping customers prevent

these situations through proper maintenance and timely repairs."

The company's comprehensive approach includes furnace repair and installation, boiler services, geothermal systems, and high-efficiency heating solutions. Additionally, the company maintains its full range of plumbing services year-round, addressing issues from frozen pipe repairs to water heater replacements.

Recent industry data highlights the importance of regular heating system maintenance, with properly maintained furnaces operating up to 30 percent more efficiently than neglected units. This efficiency translates directly into lower energy costs for homeowners during peak heating months.

Northwest Plumbing Heating & AC has introduced Service Partner Agreements starting at $99 annually for heating systems. These agreements include scheduled maintenance visits, priority service scheduling, and waived after-hours fees for emergency situations. The preventative maintenance plans help identify potential issues before they become costly repairs.

The company also offers AC repair services as part of its comprehensive home comfort solutions. While air conditioning may seem less critical during winter months, the company emphasizes the importance of year-round HVAC maintenance to ensure systems are ready when needed.

"Regular maintenance extends equipment life and prevents unexpected breakdowns," added Durand. "We encourage homeowners to schedule their annual furnace inspections now, before the heaviest part of winter arrives."

The company provides free estimates for furnace replacements and offers financing options through GreenSky to make necessary repairs and upgrades more accessible. Monthly specials and seasonal promotions provide additional value for customers seeking to upgrade or maintain their home comfort systems.

This news article highlights the company's commitment to serving the Quad Cities community with reliable heating and plumbing solutions. With nearly a century of experience, Northwest Plumbing Heating & AC maintains a 4.8 out of 5.0 rating from over 650 customer reviews.

Northwest Plumbing Heating & AC operates from its Davenport location, providing 24-hour emergency service alongside its regular maintenance and installation services. The company's team of certified technicians has experience with all types of heating systems, from traditional furnaces to modern geothermal installations.
