

Speedy Dumpster Solutions Partners with Longview School District for Campus Waste Management Service

April 21, 2026

April 21, 2026 -

Speedy Dumpster Solutions has established a partnership with Longview Independent School District to provide comprehensive waste management services across multiple campus locations throughout Gregg County. The collaboration addresses the district's ongoing need for reliable dumpster rental services while supporting environmental sustainability initiatives within the educational community.

The partnership encompasses waste disposal solutions for the district's various campuses, including regular service for routine campus operations and specialized support for construction projects, renovations, and large-scale events. The arrangement provides the school district with access to multiple dumpster sizes ranging from 15 to 40-yard containers, ensuring appropriate waste management capacity for different campus needs.

"This partnership represents our commitment to supporting educational institutions in maintaining clean, safe environments for students and staff," said William Bailes, owner of Speedy Dumpster Solutions. "Working with Longview ISD allows us to contribute directly to the community while ensuring proper waste management practices are maintained across all school facilities."

The collaboration addresses several critical needs within the school district, including managing waste from cafeteria operations, handling debris from maintenance and renovation projects, and providing additional capacity during special events and seasonal activities. The flexible service model allows individual campuses to request dumpsters based on their specific requirements, with rental periods extending up to seven days and options for extended service when needed.

Environmental responsibility remains a central focus of the partnership. All waste collected from school campuses undergoes proper disposal at Pine Hill Landfill, with materials sorted according to local regulations and sustainability guidelines. The program excludes hazardous materials, ensuring compliance with safety standards while promoting responsible waste management practices among students and staff.

The partnership also creates educational opportunities for students to learn about waste reduction, recycling, and environmental stewardship. By observing proper waste management practices on their campuses, students gain practical understanding of sustainability principles that extend beyond the classroom.

"Educational institutions generate significant waste volumes throughout the academic year, from daily operations to special projects," noted Bailes. "Our role extends beyond simply providing dumpsters; we help the district implement efficient waste management strategies that reduce costs and environmental impact while maintaining clean, healthy learning environments."

The service arrangement includes scheduled pickups, emergency response capabilities for unexpected waste management needs, and coordination with district facilities management teams. This comprehensive approach ensures minimal disruption to educational activities while maintaining consistent waste removal services across all participating campuses.

Speedy Dumpster Solutions brings extensive experience serving the East Texas region, including communities in Kilgore, Longview, Gladewater, Marshall, and Tyler. As a family-owned business, the company has built its reputation on reliable service, competitive pricing, and commitment to environmental responsibility. The company offers various dumpster sizes to accommodate different project scales, from small renovations to large construction projects, with transparent pricing that includes tonnage allowances and clear guidelines for additional services. Through partnerships with local organizations and businesses, the company continues to expand its role in supporting community waste management needs while promoting sustainable practices throughout the region.
