Affinity TruFrame Cabinetry Expands Custom Cabinet Services Across Englewood and Denver Metro Area

May 26, 2026

ENGLEWOOD, CO - May 26, 2026 -
Affinity TruFrame Cabinetry, a Colorado-based manufacturer of high-end custom cabinetry, announces expanded service capabilities throughout the Denver metropolitan area and Colorado Front Range. The expansion addresses growing demand for the company's patented TruFrame design technology, which combines the structural advantages of both framed and frameless cabinet construction.

The Englewood-based company specializes in creating custom cabinetry Denver homeowners and designers seek for luxury residential projects. The expansion enables the company to serve a broader client base including interior designers, luxury builders, and homeowners across Denver, Littleton, Highlands Ranch, Cherry Hills Village, Greenwood Village, Centennial, Castle Rock, Boulder, and surrounding communities.

"The demand for sophisticated cabinet engineering has grown significantly as Colorado homeowners increasingly view their kitchens and bathrooms as architectural showcases rather than purely functional spaces," said Cayd Bader, owner of Affinity TruFrame Cabinetry. "Our TruFrame technology delivers the structural integrity clients expect while maximizing interior space utilization, making it an ideal solution for both traditional and contemporary design aesthetics."

The company's proprietary TruFrame design represents a significant advancement in cabinet construction methodology. Unlike traditional approaches that require choosing between framed or frameless designs, the TruFrame system incorporates advantages from both styles. This innovation allows for full cabinet access while maintaining the sturdy construction associated with framed cabinetry.

Affinity TruFrame Cabinetry offers more than forty distinct door styles, each customizable with various finishes to achieve precise aesthetic goals. The extensive collection includes options for inset cabinetry suited to traditional designs as well as European-style frameless configurations for modern spaces. As a provider of cabinets Englewood CO residents trust for luxury projects, the company maintains its design

studio and manufacturing operations at its Englewood facility.

The expansion comes at a time when Colorado's luxury home improvement sector continues demonstrating strong growth patterns. Market data indicates particular demand for custom solutions that reflect individual lifestyle needs and architectural preferences. The company's ability to provide both traditional and contemporary cabinet styles positions it to serve this diverse market effectively.

Wholesale cabinets Englewood CO dealers offer represent another dimension of the company's expanded services. Through strategic dealer partnerships throughout Colorado and neighboring states, Affinity TruFrame Cabinetry extends its reach while maintaining the personalized service and quality control standards that define its brand.

The company's Englewood facility serves as a collaborative hub where homeowners, interior designers, and the Affinity TruFrame Cabinetry team develop customized solutions for each project. Clients can explore the full range of door styles, finishes, and configuration options while working directly with cabinet design specialists.

Affinity TruFrame Cabinetry maintains its commitment to exceptional craftsmanship through its comprehensive warranty program and dedication to regional customer service. The company continues to showcase completed installations across diverse architectural styles, demonstrating the versatility of its cabinet systems in both renovation and new construction projects.
