

Healing Oasis Phytoceramides Back In Stock At Amazon

April 23, 2015

April 23, 2015 - PRESSADVANTAGE -

Last year, after the FDA approved Phytoceramides for oral supplementation, Healing Oasis launched their phytoceramides product on Amazon. The product has been so well received that stock recently ran out. The company has now announced that the Healing Oasis Phytoceramides are once again available at Amazon.

"We were overwhelmed with the quality and the speed of the results people are reporting with our phytoceramides," says Ms. Susan 'Rae' Luscombe, founder of Healing Oasis. "We want the world to be able to use this amazing product, but we hadn't expected this much demand this quickly. Luckily, we are fully stocked again now so anyone who wasn't able to purchase it the first time around, or who is ready for their next supply, should not have any problems."

Phytoceramides have been used in Ayurvedic medicine for thousands of years and modern science is finally starting to catch up on just how important they actually are. Ms. Luscombe has spent around 17 years working together with Dr. Glen Swartwout, who developed the Clinical Theory of Everything. The Clinical Theory of Everything is still very new, but it is the first of its kind as well. It scientifically explains that the mind, body and spirit are synergistic, with each element working on its own biochemical and quantum energetic level. Phytoceramides are a holistic type of treatment that addresses the mind, body and spirit simultaneously since they are involved in the membrane structure and biocommunication of every cell.

"Phytoceramides are becoming extremely popular as a healthy alternative to face lifts and botox injections," adds Susan Luscombe. "Besides the cosmetic benefits, we see fundamental restoration of youthful skin health and function. In addition, research is showing that ceramides are crucial in every cell in the body. Ceramides' regulatory functions controlling anabolic versus catabolic metabolism, and even apoptosis are central to the side benefits that we are observing with this new supplement."

Phytoceramides are a type of potent antioxidant that is able to encourage cells to heal themselves, visibly regenerating and rejuvenating the skin in particular. Indeed, they have been hailed as the fountain of youth, and they are used by various A-list celebrities, including Kelly Ripa, Cindy Crawford, Jennifer Aniston and

Ellen DeGeneres. In simple terms, phytoceramides go beyond stopping free radicals. They are more like conductors of the cellular orchestra, regulating communication and the balance of catabolic (cleansing) versus anabolic (repairing) metabolism. In the skin, Phytoceramides restore the barrier function that keeps moisture in and all the 'bad guys' like toxins, allergens and infections out. As a result, fine lines and wrinkles are reduced, skin appears more radiant and people generally feel better on the inside, which also shines through on the outside.

Healing Oasis provides the highest quality botanical source phytoceramides on the market today. Through her work with Dr. Swartwout, Ms. Luscombe has learned about the inner workings of phytoceramides, and this has translated into the high quality of the product. Results are promised to be rapid and noticeable, which is one of the reasons for the popularity of the supplement itself.
