

Better Builders Transforms Kitchen Design Approach to Meet Evolving Homeowner Demands

April 22, 2026

SEATTLE, WA - April 22, 2026 - PRESSADVANTAGE -

Better Builders, a Seattle-based design-build remodeling company, is addressing the growing demand for multifunctional kitchen spaces by implementing an innovative approach that transforms traditional cooking areas into dynamic lifestyle hubs. The company's methodology emphasizes customization, sustainability, and seamless indoor-outdoor flow to create kitchens that serve as the centerpiece of modern homes.

The shift reflects changing homeowner priorities as families seek spaces that accommodate cooking, entertaining, remote work, and family gatherings within a single, cohesive environment. By integrating open-concept layouts, tailored cabinetry, and efficient spatial planning, the company helps homeowners move beyond outdated designs to create highly functional environments that adapt to contemporary living patterns.

"Today's homeowners view the kitchen as much more than a place to prepare meals," said Pete Baughman, Principal Designer at Better Builders. "They want spaces that facilitate connection, support multiple activities

throughout the day, and reflect their personal style while maintaining practical functionality. Our design-build approach allows us to deliver these complex requirements through careful planning and customized solutions."

The company's approach combines architectural expertise with practical construction knowledge to ensure each project balances aesthetic appeal with everyday functionality. This integrated methodology allows for greater coordination between design vision and construction reality, resulting in more efficient project execution and higher-quality outcomes.

Better Builders kitchen remodeling services encompass comprehensive transformations that address both structural and aesthetic elements. The company manages every aspect of the renovation process, from initial design concepts through final construction, ensuring consistent quality and clear communication throughout the project timeline.

Sustainability plays a central role in the company's remodeling philosophy. By incorporating eco-friendly materials and energy-efficient solutions, Better Builders helps homeowners reduce their environmental footprint while creating spaces that offer long-term value and reduced operating costs.

"The integration of sustainable practices isn't just about environmental responsibility," added Baughman. "It's about creating spaces that perform better, last longer, and provide healthier environments for families. When we combine these elements with thoughtful design and quality craftsmanship, we deliver renovations that truly enhance how people experience their homes."

The company's team includes architects, designers, and skilled craftsmen who collaborate on each project to ensure precise execution of design details. This collaborative approach, combined with transparent communication practices, keeps clients informed and confident throughout the remodeling process.

Better Builders backs its work with an industry-leading 5-year warranty on every project, demonstrating confidence in its craftsmanship and commitment to long-term client satisfaction. This warranty extends beyond typical industry standards and reflects the company's dedication to quality construction and lasting value.

With over 35 years of experience in the Seattle metropolitan area, Better Builders has established itself as a premier design-build remodeling company specializing in custom homes, whole-house remodels, and various renovation projects. The company's comprehensive service offerings include bathroom remodels, home additions, basement transformations, and outdoor living spaces, all delivered with the same commitment to

quality and client satisfaction that defines its kitchen remodeling work.
