

USA Cabinet Store Expands Local Bathroom Remodeling Services to Meet Growing Demand

April 23, 2026

FAIRFAX, VA - April 23, 2026 - PRESSADVANTAGE -

USA Cabinet Store, a kitchen and bath remodeling provider with 14 showrooms nationwide, has expanded its bathroom remodeling services in McLean, Virginia and surrounding Northern Virginia markets, building on its April 2026 launch of dedicated regional designer coverage at the Fairfax showroom. The move responds to rising demand for wellness-focused bathroom designs and more streamlined renovation support in 2026.

The expansion enhances the company's single-point project coordination model, with regional designers managing each project from initial consultation through final installation. The move reflects broader remodeling demand in Northern Virginia, including affluent submarkets such as McLean, where mid-range bathroom renovation projects typically range from \$17,000 to \$35,000, compared with a national average of about \$12,000, according to Remodeling Magazine's Cost vs. Value report. These projects also typically deliver an estimated 70 to 75 percent return on investment for homeowners.

"Bathroom remodeling today involves far more than new fixtures ? it requires careful coordination of

waterproofing, ventilation, plumbing rough-ins, and tile specification," said Emin Halac, CEO of USA Cabinet Store. "Our expanded services are designed to simplify that process for homeowners while incorporating universal design features and accessibility options that align with wellness-focused trends identified by the National Kitchen and Bath Association for 2026."

The expanded service model assigns one regional designer to oversee design consultation, fixture and material selection, permitting documentation, tile and vanity specification, and installation scheduling. This coordinated approach is intended to reduce project friction as bathroom renovations increasingly include smart features, specialized plumbing fixtures, custom storage, and more advanced stone and tile applications.

Industry data continues to support sustained demand for these types of upgrades. The Harvard Joint Center for Housing Studies' Leading Indicator of Remodeling Activity (LIRA) projects homeowner improvement and repair spending will reach a record \$524 billion in early 2026, supported by rising home values and a continued shift among homeowners toward upgrading existing properties rather than relocating. Homeowner priorities in bathroom projects have increasingly moved toward improved storage, larger showers, comfort features, and aging-in-place design ? elements that align with the wellness-oriented direction of modern renovations. In markets like McLean, where home values and renovation budgets typically exceed regional averages, demand for higher-specification bathroom projects has been particularly strong.

Local bathroom remodeling services through USA Cabinet Store include projects ranging from selective updates to full-scale renovations. The company's capabilities include vanity installation, storage planning, custom sizing options, countertop selection, tile coordination, and design integration intended to improve both functionality and visual consistency throughout the space.

Each project draws from the company's product portfolio, which includes bathroom cabinets, granite and quartz countertops, and tile options suited to a range of layouts and design preferences. In addition to product selection, project teams coordinate key technical elements such as plumbing fixture placement, electrical requirements, and ventilation planning.

Local remodel services provided by USA Cabinet Store are available through showroom locations in Virginia, Maryland, North Carolina, Texas, New Jersey, Missouri, Florida, and Tennessee. The company specializes in kitchen and bathroom remodeling services, offering comprehensive solutions that include cabinetry, countertops, tiles, sinks, faucets, and hardware. Each showroom provides professional consultations where customers can explore design options and view product displays to inform their remodeling decisions.
