Ryan & Gordy?s Glass Stresses Proper ADAS Recalibration Following Auto Glass Repair in Modern Vehicles

April 23, 2026

HASTINGS, MN - April 23, 2026 -

Ryan & Gordy?s Glass underscores the importance of professional ADAS recalibration after any auto glass repair or windshield replacement, as vehicles increasingly rely on advanced driver assistance systems for safety. The company, serving Minnesota and Wisconsin since 1972, notes that cameras, sensors, and radar units mounted on or behind windshields must be accurately realigned to maintain the correct operation of features, such as lane departure warnings, forward collision alerts, automatic emergency braking, and adaptive cruise control.

Technicians at Ryan & Gordy?s Glass complete specialized training to perform recalibrations in accordance with vehicle manufacturer specifications. This process uses diagnostic equipment and software designed for precise adjustments following glass work. The company emphasizes that skipping or improperly performing recalibration can compromise the effectiveness of safety systems, potentially affecting vehicle performance in critical situations.

Auto glass repair services address rock chips and small cracks using high-quality resins to restore clarity and

prevent spreading. When damage requires full replacement, the company installs new windshields with premium Sika adhesives selected for strength and long-term durability. Services extend to side windows, rear glass, automotive mirrors, pickup truck rear sliders, topper glass, and laminated glass for recreational vehicles and heavy equipment. Mobile service allows technicians to complete repairs and recalibrations at customer locations, including homes, workplaces, or along roadways.

The company assists with insurance claims throughout the process, coordinating approvals and documentation to reduce customer effort. Emergency availability ensures prompt response when glass damage occurs unexpectedly. Free estimates help vehicle owners understand options based on the specific extent of damage and vehicle type.

In addition to automotive work, Ryan & Gordy?s Glass provides residential and commercial glass solutions. Residential offerings include custom shower doors and enclosures, mirror fabrication, window replacements, patio table tops, fireplace glass, tempered glass, and custom cuts of Plexiglass and Lexan sheets. Commercial services cover storefront replacements, office and retail installations, and industrial glass projects, with a focus on minimizing operational disruptions.

Facilities in Hastings and Red Wing, Minnesota, support services across the region. As a member of the National Glass Association, the company maintains adherence to industry standards. Technicians hold Auto Glass Association certifications that guide consistent, quality workmanship.

Jay Ryan, co-owner of Ryan & Gordy?s Glass, said, "Advanced driver assistance systems have changed expectations for glass service. Proper recalibration after auto glass repair is essential to restore full safety functionality in today?s vehicles."

Ryan added, "Our team combines experience with the latest equipment to handle both the glass installation and the necessary recalibration in one efficient visit. This integrated approach supports customer safety without unnecessary delays."

Customer experiences highlight the value of these services. One vehicle owner reported a positive outcome with insurance coordination and recalibration completed seamlessly after windshield replacement. Another noted quick mobile response for crack repair, with the vehicle returned to safe operation promptly.

Ryan & Gordy?s Glass continues to adapt to changes in automotive technology while upholding its long-standing commitment to quality across all glass applications. The family-operated business has served communities in Minnesota and Wisconsin for over five decades, focusing on reliable solutions that prioritize structural integrity and safety standards.

The emphasis on correct procedures reflects broader industry recognition of the intersection of glasswork and vehicle electronics. By maintaining trained staff and appropriate tools, Ryan & Gordy?s Glass addresses the full scope of requirements for modern vehicles alongside traditional residential and commercial needs.
