

## **Timberline Roofing & Contracting Supports Habitat for Humanity to Build Stronger Communities**

*April 23, 2026*

WHITE BEAR LAKE, MN - April 23, 2026 - PRESSADVANTAGE -

Timberline Roofing & Contracting continues its support for Habitat for Humanity by contributing a portion of its profits to the nonprofit organization. The Minnesota-based roofing company has integrated community giving into its business model while delivering professional roofing and exterior services to homeowners in the Twin Cities region.

Founded in 1998, Timberline Roofing & Contracting is a locally owned and operated business specializing in storm damage restoration, roof replacement, repairs, siding, windows, gutters, and decking for residential and multi-family properties. The company holds GAF Master Elite certification, a designation awarded to only the top three percent of roofing contractors in the country. This certification requires ongoing training and adherence to strict quality standards in installation and customer service.

The financial contributions to Habitat for Humanity enable the organization to build and repair homes for families in need. This support reflects the company's dedication to giving back to the communities it serves across Minnesota. Over more than 25 years of operation, the company has applied its expertise to numerous projects while maintaining a consistent focus on quality and integrity in all aspects of its work. The

commitment to Habitat for Humanity aligns with the company's long-standing values of supporting local initiatives that strengthen neighborhoods and provide stable housing.

Gordy Kaufmann, owner of Timberline Roofing & Contracting, stated, "We are honored to give back by contributing a portion of our profits to Habitat for Humanity, helping to build stronger communities."

Timberline Roofing & Contracting provides comprehensive assistance to homeowners dealing with storm damage. The team guides customers through the insurance claims process, offering detailed documentation and coordination with insurance adjusters to facilitate timely repairs. On-site project management ensures that work progresses efficiently with minimal disruption to homeowners. This structured approach allows for smooth project completion from initial assessment through final walkthrough.

The company's services extend beyond roofing. Professional siding installation enhances both the appearance and energy efficiency of homes. Energy-efficient window replacements help reduce heating and cooling costs. Gutter systems direct water away from foundations, while custom decking creates usable outdoor spaces using wood, composite, or PVC materials. These complementary services contribute to overall property protection and homeowner satisfaction.

With more than 25 years in business, Timberline Roofing & Contracting employs experienced professionals who bring extensive knowledge to every project. The GAF Master Elite program emphasizes quality workmanship, proper installation techniques, and customer satisfaction. Contractors who achieve this status demonstrate consistent performance and a dedication to industry best practices. Timberline Roofing & Contracting applies these standards to every project, whether completing a full roof replacement or addressing storm-related damage. The certification process involves continuous education and evaluation to maintain the highest levels of craftsmanship.

As Minnesota experiences frequent severe weather, the need for qualified roofing professionals remains critical. Timberline Roofing & Contracting combines technical expertise with a customer-focused approach to help homeowners protect their largest investment. The company serves the Twin Cities and surrounding areas with reliable solutions tailored to regional climate conditions.

Colin Beckman, Vice President of Timberline, added, "Supporting Habitat for Humanity is part of our broader commitment to making a positive impact in the communities where our customers live and work."

Timberline Roofing & Contracting is a locally owned and operated company founded in 1998, specializing in storm damage restoration and premium roofing solutions for residential and multi-family properties in the Twin Cities area and beyond. As a GAF Master Elite certified contractor, the company maintains high standards in craftsmanship and service while contributing a portion of profits to Habitat for

Humanity.
