

Keathley Landscaping Expands Services as NDS Certified Drainage Contractor to Address Regional Water Management Challenges

May 01, 2026

GARLAND, TX - May 01, 2026 -
Keathley Landscaping, a Dallas-based landscape and drainage company, has expanded its drainage solutions capabilities following certification through the National Drainage System (NDS) contractor program. The certification enables the company to implement advanced water management systems for homeowners experiencing flooding, standing water, and erosion issues throughout North Texas communities.

The expansion comes as heavy rainfall patterns continue to challenge property owners across the region, causing foundation damage, landscape erosion, and interior flooding that standard homeowner insurance policies typically exclude from coverage. Logan Keathley, owner and NDS Certified Drainage Contractor, leads the company's drainage division with specialized expertise in French drain systems, yard grading, and custom-engineered drainage solutions.

"Property drainage issues can escalate from minor inconveniences to major structural problems within a

single storm season," said Logan Keathley, owner of Keathley Landscaping. "Our certification through NDS represents our commitment to implementing drainage solutions that protect both the immediate landscape and the long-term integrity of the home's foundation. We analyze each property's unique topography and water flow patterns to design systems that effectively redirect water away from vulnerable areas."

The company's drainage services encompass comprehensive water management solutions including French drain installation, property regrading, and custom-designed buried drain pipe systems. Each project begins with a thorough site assessment to identify water accumulation patterns, soil composition, and existing landscape features that impact drainage effectiveness. This analytical approach allows the team to develop targeted solutions for complex drainage challenges that traditional landscaping methods cannot address.

Beyond drainage solutions, Keathley Landscaping provides complete landscape renovation services including residential drainage sachse area properties and surrounding communities. The company's comprehensive approach addresses both water management and aesthetic improvements through coordinated landscape design and installation services.

"Proper drainage and quality sod installation work together to create sustainable, healthy lawns," added Keathley. "When drainage issues are resolved before sod installation, homeowners avoid the common problems of waterlogged grass, fungal growth, and premature sod failure that result from poor water management."

The company also specializes in rapid lawn transformation through professional sod installation, completing most residential projects within one to three days. Their sod installation services include murphy sod varieties along with Zoysia, St. Augustine, Bermuda, and Tall Fescue grass types selected for North Texas climate conditions. The installation process involves complete site preparation including existing vegetation removal, soil amendment, pest treatment, and proper grading to ensure optimal growing conditions.

Keathley Landscaping has served the Dallas metropolitan area since 2002, providing landscape design, construction, and maintenance services to residential and commercial properties. The company's service portfolio includes stonework and retaining walls, landscape lighting, hardscape installation, fence construction and repair, outdoor kitchens, and tree services. Their service area encompasses Dallas, Garland, Wylie, Plano, Murphy, Sachse, Allen, Rowlett, and surrounding North Texas communities.
