

Go Industries Inc Expands Durable Winch Grille Guards for Trucks with Enhanced Modular Design

May 07, 2026

Richardson, TX - May 07, 2026 -
Go Industries Inc, a Richardson, Texas-based manufacturer of truck accessories and law enforcement equipment, has expanded its winch grille guard product line with enhanced modular design features that provide increased protection and versatility for commercial and heavy-duty truck applications.

The expanded product offerings address growing demand from fleet operators, contractors, and off-road enthusiasts who require robust front-end protection combined with integrated winch capabilities. The modular design allows customers to customize their truck grille guard configuration based on specific operational requirements, adding optional brush guards and winch carriers as needed.

The enhanced winch grille guard system features construction from 5/16-inch laser-cut steel uprights paired with 2.5-inch, 16-gauge steel cross tubes. This engineering approach provides substantial protection for vehicle front ends while maintaining the structural integrity necessary to support winch operations in demanding environments. The system accommodates both 9.5 and 16.5 winch carriers, offering flexibility for

various towing and recovery applications.

"The modular approach to our winch grille guard systems reflects our commitment to meeting diverse customer needs across commercial, law enforcement, and recreational truck markets," said a Go Industries spokesperson. "By allowing customers to build their protection system incrementally, we provide both immediate value and future upgrade paths as their requirements evolve."

Installation considerations have been prioritized in the design process, with custom heavy-duty mounting brackets engineered for maximum strength and straightforward installation. The mounting system ensures proper weight distribution and secure attachment points, critical factors for maintaining vehicle safety and performance under stress.

The expanded product line complements Go Industries' existing portfolio of truck protection equipment, which includes rancher grille guards, medium-duty grille guards, bumper replacements, and headache racks. All products undergo rigorous testing to meet commercial-grade standards and come with a three-year warranty covering materials, workmanship, and finish.

Manufacturing operations remain centered at the company's Texas facility, where products are fabricated using domestic steel and advanced laser-cutting technology. This local production approach enables Go Industries to maintain quality control standards while supporting rapid fulfillment for customers across North America.

The truck accessories market continues to evolve as commercial operators and individual truck owners seek equipment that balances protection, functionality, and vehicle aesthetics. Industry data indicates steady growth in demand for modular accessory systems that allow customization without requiring complete system replacement.

Go Industries Inc has served the truck accessories and law enforcement equipment markets since 1978. The company manufactures a comprehensive range of front and back-end protection products, including grille guards, winch systems, bumper replacements, air flow tailgates, headache racks, mud flaps, and steps. The company also provides custom manufacturing services for specialized applications and maintains Platinum Status with SEMA, recognizing excellence in product quality and service standards. All Go Industries products are manufactured in the United States at the company's Richardson, Texas facility.
