

Keathley Landscaping Expands Sod Installation and Drainage Solutions for North Texas Properties

May 05, 2026

GARLAND, TX - May 05, 2026 -
Keathley Landscaping, a Dallas-based landscaping company serving North Texas since 2002, has expanded its specialized drainage and sod installation services to address increasing demand from homeowners dealing with water management issues and lawn restoration needs throughout the region.

The company, led by NDS Certified Drainage Contractor Logan Keathley, has developed comprehensive solutions for properties experiencing flooding, standing water, and erosion problems that can cause significant damage to foundations, landscaping, and outdoor living spaces. The expansion comes as North Texas homeowners increasingly recognize that standard homeowners insurance typically does not cover water damage from poor drainage.

"Property owners often don't realize the extent of damage that inadequate drainage can cause until it's too late," said Logan Keathley, owner and NDS Certified Drainage Contractor at Keathley Landscaping. "We're seeing more requests for comprehensive drainage assessments and custom solutions that go beyond

temporary fixes. Our approach addresses the root causes of water management issues while ensuring the long-term health and beauty of the landscape."

The company's drainage services include French drain installation, professional grading, and custom-designed buried drainage pipe systems tailored to each property's unique topography and water flow patterns. As a certified drainage contractor, the team conducts thorough site evaluations to identify problem areas and develop solutions that effectively redirect water away from structures and landscaping.

Alongside drainage improvements, Keathley Landscaping provides complete sod installation services that can transform properties within one to three days, depending on the project scope. The company offers multiple grass varieties suited to North Texas conditions, including St. Augustine, Zoysia, Bermuda, and Tall Fescue, with each selection chosen based on specific site conditions, sun exposure, and homeowner preferences.

The sod installation process includes comprehensive soil preparation, addressing any underlying issues such as pest problems or poor drainage before laying new turf. This integrated approach ensures that newly installed lawns have the proper foundation for healthy growth and longevity.

For properties experiencing Rowlett drainage concerns, the company has developed specialized expertise in addressing regional challenges through custom drainage solutions that work in harmony with the local environment. These solutions are particularly relevant due to soil composition and development patterns common in the area.

"When homeowners invest in new sod installation, they want to ensure their investment is protected," added Keathley. "That's why we often recommend addressing any drainage issues before or during the sod installation process. This integrated approach saves time and money while delivering better long-term results."

Beyond drainage and sod services, Keathley Landscaping offers comprehensive landscaping solutions including stonework, retaining walls, landscape lighting, hardscapes, outdoor kitchens, and tree services. The company serves Dallas, Garland, Wylie, Plano, Richardson, Allen, Frisco, Murphy, Sachse, and surrounding North Texas communities.

Keathley Landscaping has built its reputation on providing practical, cost-effective solutions to complex landscaping challenges. The company's team combines technical expertise with an understanding of North Texas climate conditions and soil characteristics to deliver lasting improvements to residential and

commercial properties throughout the region.
