

USA Cabinet Store LLC Introduces Streamlined Kitchen Remodeling Estimate Process for Triangle Area Homeowners

April 29, 2026

Cary, NC - April 29, 2026 - PRESSADVANTAGE -

USA Cabinet Store Cary has introduced a comprehensive kitchen remodeling estimate program designed to provide Triangle-area homeowners with detailed, transparent project pricing before committing to renovation projects. The structured program pairs homeowners with dedicated regional designers who manage the complete estimate scope, from initial cabinetry layout through installation timeline planning.

The initiative addresses a growing demand for cost transparency in the Cary market, where median household income reaches \$129,399 according to U.S. Census Bureau data, and median home values range between \$571,000 and \$600,000. This program supports homeowners across the broader Triangle region by providing clear, predictable pricing structures tailored to various property types, maintaining a neutral and accessible approach for the community.

"Kitchen Remodeling has become increasingly complex with the integration of custom cabinetry

configurations, premium countertop materials, and sophisticated appliance packages," said Emin Halac, President of USA Cabinet Store. "Our structured estimate process documents each project element individually, giving homeowners the detailed cost breakdown they need to make informed investment decisions about their homes."

The program provides homeowners with documented project scopes that include itemized cost breakdowns by category, covering cabinetry, countertops, appliances, labor, and finishes. Each Kitchen Remodeling Estimate incorporates full-scope coverage including cabinetry layout and door style selection, countertop material specification, backsplash and tile coordination, appliance integration, plumbing and electrical scope, lighting plans, and installation scheduling.

According to Remodeling Magazine's Cost vs. Value report for the Raleigh metro area, midrange minor kitchen remodels average approximately \$27,000, while major midrange kitchen remodels typically range from \$80,000 to \$90,000, and upscale projects can exceed \$160,000. Because comprehensive renovations represent significant investments, accurate upfront estimates are essential for proper homeowner planning. "Having a detailed, itemized breakdown before starting construction eliminates the anxiety typically associated with renovation costs and keeps project expectations aligned," noted a recent Triangle-area client who utilized the new estimate process.

The Harvard Joint Center for Housing Studies' Leading Indicator of Remodeling Activity projects total homeowner improvement and repair spending will reach a record \$524 billion in early 2026, with kitchen renovations consistently ranked among the most-invested project categories. This growth reflects increasing project complexity as homeowners incorporate custom cabinetry configurations, integrated appliance specifications, and premium stone and quartz countertop materials identified in National Kitchen and Bath Association 2026 design trends.

The Cary showroom operates as part of USA Cabinet Store's national network of more than 14 showrooms across seven states including Virginia, Maryland, North Carolina, Texas, New Jersey, Florida, and Tennessee. The showroom carries nine cabinet lines spanning ready-to-assemble through German-engineered frameless construction, including RTA Cabinets, Fabuwood, Showplace, UltraCraft, Mantra, Legacy Crafted, 1951 Cabinetry, Bertch, and Bauformat.

Founded in 2011, USA Cabinet Store has completed thousands of kitchen and bath remodels across its multi-state footprint, earning industry recognition that includes consecutive Best of Houzz Service awards and the 2026 NKBA Innovative Showroom Award.
