

Keathley Landscaping Expands Sod Installation and Advanced Drainage Solutions for North Texas Properties

May 06, 2026

GARLAND, TX - May 06, 2026 -
Keathley Landscaping, a certified drainage contractor serving the Dallas-Fort Worth metroplex, announces expanded capabilities in addressing complex yard drainage issues while offering rapid sod installation services throughout the region. The company combines NDS Certified Drainage Contractor expertise with comprehensive landscaping solutions to help homeowners protect their properties from water damage and transform outdoor spaces.

As North Texas continues to experience unpredictable weather patterns and heavy rainfall events, proper yard drainage has become increasingly critical for homeowners. Poor drainage can lead to foundation damage, standing water, and landscape deterioration that insurance policies typically do not cover. Keathley Landscaping Wylie addresses these challenges through innovative drainage solutions including French drains, professional grading, and custom-designed buried drainage pipe systems.

"Every property presents unique drainage challenges that require both technical expertise and practical problem-solving skills," said Logan Keathley, NDS Certified Drainage Contractor and founder of Keathley Landscaping. "We analyze water flow patterns, soil composition, and landscape features to develop customized solutions that protect homes while maintaining the aesthetic appeal of the yard. Our certification and experience allow us to tackle even the most complex drainage problems effectively."

The company's drainage services complement its established sod installation capabilities, which can transform bare or damaged yards into lush green lawns within one to three days. This dual expertise allows homeowners to address both functional drainage needs and aesthetic landscape improvements through a single contractor. The integration of proper drainage with new sod installation ensures long-term lawn health and prevents common issues such as pooling water, erosion, and grass disease.

Keathley Landscaping has served the Dallas-Fort Worth area since 2002, building a reputation for reliable service and innovative solutions. The company's comprehensive approach includes initial consultation, design planning, and professional installation of various landscape features. Beyond drainage and sod installation, services encompass landscape lighting, stonework, retaining walls, hardscapes, fence repair and installation, patio covers, outdoor kitchens, fire pits, and tree services.

The importance of professional drainage installation extends beyond immediate water management. Proper drainage systems protect home foundations from moisture damage, reduce mosquito breeding grounds, prevent soil erosion, and maintain healthy landscape conditions year-round. These systems require precise engineering and installation to function effectively, making professional expertise essential for long-term success.

For sod installation projects, the company works with various grass types suited to North Texas climates, including St. Augustine, Zoysia, and Bermuda varieties. Each installation considers factors such as sun exposure, soil conditions, and drainage patterns to ensure optimal grass establishment and growth.

Keathley Landscaping continues to expand its service capabilities throughout Dallas, Garland, Wylie, Plano, and surrounding communities. The company maintains its commitment to providing practical, cost-effective solutions that address both immediate landscape concerns and long-term property protection needs. Through combining certified drainage expertise with comprehensive landscaping services, the company offers integrated solutions that enhance property value while solving critical water management challenges.
