

Monett Veterinary Hospital Highlights Comprehensive Pet Boarding Services for Aurora Missouri Residents

May 07, 2026

MONETT, MO - May 07, 2026 -
Monett Veterinary Hospital, a full-service animal care facility serving southwestern Missouri since 1953, emphasizes the availability of its comprehensive boarding services for pet owners in Aurora and surrounding communities as the spring travel season approaches.

The AAHA-accredited veterinary hospital offers specialized boarding accommodations designed to meet the distinct needs of both dogs and cats, providing peace of mind for pet owners who require reliable care for their companions during travel or extended absences. The facility maintains separate, climate-controlled spaces for different species, ensuring optimal comfort and reducing stress for boarding guests.

"As travel increases during the spring and summer months, pet owners need dependable boarding options that prioritize their animals' health and well-being," said Erin Carnes, Client Services Coordinator at Monett Veterinary Hospital. "Our boarding services combine professional veterinary oversight with comfortable accommodations, allowing owners to travel with confidence knowing their pets receive exceptional care."

The Monett Vet Pet Boarding program includes individualized care plans tailored to each animal's specific requirements. Staff members conduct daily health observations, maintain regular feeding schedules based on dietary needs, and administer any required medications. The facility's veterinary team remains available to address any health concerns that may arise during a pet's stay.

For canine guests, the Monett Vet Dog Boarding service provides spacious accommodations with opportunities for supervised exercise and socialization through the hospital's doggie daycare program. Feline boarders enjoy quiet, separate spaces designed to minimize stress and maintain their comfort throughout their stay.

The boarding services complement the hospital's comprehensive range of veterinary care options, including routine and specialized surgery, radiology, internal medicine, preventive care, and grooming. This integration ensures that boarding guests have immediate access to medical care if needed, distinguishing the facility from standalone boarding kennels.

Pet owners planning upcoming travel are encouraged to schedule boarding reservations in advance, particularly during peak travel periods when demand for professional pet care services typically increases. The hospital's staff works with each owner to understand their pet's unique needs, preferences, and any special requirements to ensure a positive boarding experience.

Monett Veterinary Hospital has served the southwestern Missouri region for more than seven decades, evolving from a single-veterinarian practice established by Dr. C.J. McCormick in 1953 to a comprehensive animal care facility. The hospital received the AAHA Commitment to Excellence Award in 2007 and was recognized as a Veterinary Economics Architectural Award Excellence winner. The facility continues to expand its services to meet the changing needs of pet owners throughout the region, including residents of Aurora, Monett, and neighboring communities. The hospital's commitment to excellence in veterinary medicine extends to all aspects of pet care, from preventive wellness programs and advanced surgical procedures to professional boarding and grooming services.
