

# Monett Veterinary Hospital Expands Advanced Pet Surgery Services for Aurora Missouri Communities

*May 15, 2026*

MONETT, MO - May 15, 2026 -

Monett Veterinary Hospital has expanded its advanced surgical capabilities to better serve pet owners throughout southwestern Missouri, including Aurora and surrounding communities. The AAHA-accredited facility, which has provided veterinary care since 1953, now offers enhanced laser and radiowave surgical procedures designed to improve patient outcomes and reduce recovery times for pets requiring both routine and complex operations.

The expanded surgical program addresses growing demand for specialized veterinary procedures in the region. The hospital's surgical suite features advanced technology that enables veterinarians to perform orthopedic surgeries, major abdominal and thoracic procedures, and trauma surgeries with greater precision and safety. These capabilities position the facility as a referral center for local veterinarians requiring advanced surgical support.

"The integration of laser and radiowave technology into our surgical protocols represents a significant

advancement in how we deliver care to our patients," said Erin Carnes, spokesperson for Monett Veterinary Hospital. "These techniques allow us to perform procedures with minimal tissue damage, resulting in less pain and bleeding for the animal, which translates to faster healing times and improved comfort during recovery."

The hospital's comprehensive approach to Monett Vet Pet And Animal Surgery includes pre-operative assessments, advanced anesthesia monitoring, and dedicated post-operative care protocols. Each surgical patient receives individualized attention from the veterinary team, ensuring optimal outcomes whether undergoing routine procedures such as spaying and neutering or more complex orthopedic interventions.

Beyond surgical services, the facility maintains a full spectrum of veterinary care, including internal medicine, radiology, preventive wellness programs, and dental services. The dental suite provides comprehensive oral health treatments ranging from routine cleanings to complex extractions and laser therapy for periodontal disease.

The expansion of surgical services comes as pet ownership continues to rise across Missouri, with more families seeking specialized veterinary care closer to home. The hospital serves multiple communities including Pierce City, Purdy, Cassville, Mt Vernon, and Aurora, eliminating the need for pet owners to travel to distant metropolitan areas for advanced procedures.

"Our commitment extends beyond treating immediate health concerns to providing comprehensive care that enhances the quality of life for pets throughout their lifetime," added Carnes. "By offering these advanced surgical options locally, we help pet owners access the care their animals need without the stress and expense of traveling to specialty centers in larger cities."

The hospital also offers boarding, doggie daycare, and grooming services, providing a comprehensive care environment for pets. Its TLC Wellness Care Program offers customized preventive care plans that include routine testing, examinations, and vaccinations designed to maintain optimal pet health.

Monett Veterinary Hospital was established by Dr. C.J. McCormick in 1953 and has evolved from a single-veterinarian practice into a comprehensive animal care facility. The hospital received the AAHA Commitment to Excellence Award in 2007 and continues to maintain accreditation through the American Animal Hospital Association, meeting rigorous standards for veterinary practice management and patient care.
