

Keathley Landscaping Expands Residential Drainage and Sod Installation Services to Address Growing Demand

May 08, 2026

GARLAND, TX - May 08, 2026 -
Keathley Landscaping, a Dallas-based landscaping company, has expanded its specialized drainage solutions and sod installation services to meet increasing homeowner demand for comprehensive yard restoration and water management solutions across Parker and surrounding North Texas communities.

The expansion comes as more homeowners face costly water damage from inadequate yard drainage systems, with many discovering that standard homeowner insurance policies do not cover flooding damage caused by poor drainage. The company's dual expertise in both drainage correction and lawn restoration provides homeowners with a complete solution for transforming problematic yards into functional, attractive outdoor spaces.

"Homeowners often don't realize they have a drainage problem until heavy rains cause flooding that threatens their foundation or floods their home," said Logan Keathley, NDS Certified Drainage Contractor and

owner of Keathley Landscaping. "By combining our drainage expertise with professional sod installation, we can solve the water management issues first, then restore the lawn to better condition than before the problems started."

As an NDS Certified Drainage Contractor, Logan Keathley brings specialized training in identifying and resolving complex drainage challenges. The certification, provided by NDS Inc., a leading manufacturer of drainage products, ensures contractors have advanced knowledge of proper water management techniques, from French drain installation to comprehensive grading solutions. This expertise allows the company to address issues ranging from standing water and erosion to foundation threats and landscape damage.

The company's sod service parker residents rely on can transform yards from damaged dirt to lush green lawns in one to three days, depending on property size. This rapid transformation is particularly valuable for homeowners who have experienced drainage-related lawn damage or those preparing properties for sale. The combination of proper drainage installation followed by professional sod installation ensures long-term lawn health and prevents future water-related issues.

Beyond drainage and sod installation, the company offers comprehensive landscaping services including landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, fence repair and installation, patio covers, outdoor kitchens, firepits, and tree trimming and removal. This full-service approach allows homeowners to address multiple outdoor needs through a single contractor, ensuring consistency in quality and design.

"Property owners invest significant resources in their outdoor spaces, but without proper drainage, those investments are at risk," added Keathley. "Our approach addresses the root cause of yard problems first, then rebuilds the landscape to be both beautiful and resilient against future weather challenges."

The expanded services come at a critical time as North Texas continues to experience periods of heavy rainfall followed by drought conditions, creating challenging conditions for maintaining healthy lawns and proper water management. The company's integrated approach helps homeowners protect their property values while creating outdoor spaces that remain functional and attractive throughout changing weather patterns.

Keathley Landscaping has served the Dallas metropolitan area since 2002, establishing a reputation for practical solutions and quality workmanship. The company specializes in residential properties throughout Dallas, Garland, Wylie, Plano, Parker, and surrounding communities, providing both emergency drainage solutions and planned landscape improvements.
