

Amana Care Clinic Expands Diagnostic Capabilities Across Davenport, Iowa Urgent Care Locations

April 28, 2026

DAVENPORT, Iowa - April 28, 2026 -

Amana Care Clinic has expanded its diagnostic capabilities across three Iowa locations in Davenport, Bettendorf, and Muscatine, adding comprehensive laboratory testing and digital X-ray equipment to address regional healthcare capacity constraints. The expansion follows data from the Iowa Department of Public Health showing that non-emergency visits account for approximately 30 percent of hospital emergency department volume statewide.

The clinic's expanded capabilities now include on-site laboratory testing for blood work, urinalysis, and rapid diagnostic testing, along with digital X-ray imaging for immediate diagnosis of fractures and other conditions. These additions enable medical staff to diagnose and treat a wider range of conditions during single visits, reducing the need for referrals to other facilities.

"The expansion of our diagnostic capabilities allows our medical staff to provide more comprehensive care during each patient visit," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic. "With on-site

laboratory and X-ray services, we can diagnose conditions ranging from urinary tract infections to minor fractures without requiring patients to visit multiple facilities."

The walk-in medical facilities provide Amana Care Clinic Davenport urgent care services for both pediatric and adult patients, treating conditions including ear infections, minor burns, lacerations, and musculoskeletal injuries. Medical staff perform suture placement and removal, splinting for minor fractures, and treatment for work-related injuries that do not require emergency intervention.

The expansion comes as regional healthcare facilities face continued capacity constraints and extended wait times for non-emergency medical treatment. Walk-in clinics have emerged as an alternative care setting for these cases, with the ability to treat conditions that would otherwise require hospital emergency department visits.

"The addition of online check-in systems allows patients to reserve their place in line remotely and receive text notifications when to arrive," noted Dr. Kotob. "This reduces time spent in waiting areas and helps patients plan their visits around work and family schedules."

Amana Care Clinic non-emergency treatment near Davenport IA includes care for seasonal illnesses, sports physicals required for school athletic participation, wound management, and treatment of common infections. The clinic's medical professionals also provide follow-up care for wounds and injuries initially treated at other facilities.

The clinic's expanded diagnostic capabilities enable treatment for abrasions, back pain, insect and animal bites, childhood illnesses, cold and flu symptoms, diarrhea, joint pain, muscle strains, rashes, and sinus infections. Each location maintains the equipment and staffing necessary to provide immediate diagnosis and treatment without appointments.

Amana Care Clinic operates as a walk-in medical provider serving communities in Davenport, Bettendorf, and Muscatine, Iowa. The clinic specializes in immediate medical care for non-emergency conditions, maintaining full laboratory and X-ray capabilities at each location. The medical facilities provide treatment for acute illnesses and injuries without requiring appointments, serving as an alternative to hospital emergency departments for non-critical medical needs.
