

Tristar Automotive Expands Brake Service Offerings to Meet Growing Vehicle Safety Demands

April 29, 2026

April 29, 2026 -

Tristar Automotive, a Santa Rosa-based auto repair facility serving Northern California since 1991, has expanded its brake service and repair capabilities to address increasing demand for comprehensive vehicle safety inspections and maintenance. The expansion comes as vehicle owners prioritize preventive maintenance and safety checks amid rising road travel throughout the region.

The enhanced brake service offerings include advanced diagnostic capabilities, expanded inventory of brake components for both domestic and import vehicles, and extended service hours to accommodate the growing number of customers seeking professional brake inspections and repairs. The expansion reflects the company's response to data showing that brake-related issues remain one of the leading causes of vehicle accidents and roadside emergencies.

"As vehicles age and accumulate mileage, brake system maintenance becomes increasingly critical for driver and passenger safety," said Daniel Erdman, Service Manager at Tristar Automotive. "Our expanded brake

services ensure that drivers have access to comprehensive inspections and repairs that meet or exceed manufacturer specifications, helping prevent potential brake failures before they become dangerous situations on the road."

The Tristar Automotive brake shop now offers complete brake system evaluations that include inspection of brake pads, rotors, calipers, brake fluid, and hydraulic systems. The facility's ASE Certified technicians utilize state-of-the-art diagnostic equipment to identify potential issues before they compromise vehicle safety or lead to more costly repairs.

Brake system maintenance has gained renewed attention as vehicle owners keep their cars longer than in previous decades. According to industry data, the average age of vehicles on American roads has reached record levels, making regular brake inspections and timely repairs essential for maintaining safe driving conditions. The company's expanded services address this trend by providing thorough brake system assessments and using quality replacement parts backed by nationwide warranties.

The timing of the expansion aligns with seasonal driving patterns that typically see increased vehicle usage during summer months and holiday travel periods. Regular brake maintenance helps ensure vehicles can handle varied driving conditions, from stop-and-go city traffic to highway speeds and mountain driving common in Northern California.

As an authorized NAPA AutoCare Center and AAA Approved Auto Repair Station, Tristar Automotive maintains strict quality standards for all brake service and repair work. The facility's membership in the Automotive Service Association and A+ rating with the Better Business Bureau reflect its commitment to professional service and customer satisfaction.

Tristar Automotive provides comprehensive auto repair services, including fleet maintenance, factory-scheduled maintenance, engine service and replacement, transmission repair, air conditioning service, suspension and steering work, and operates as a certified smog check station. The company has served the Santa Rosa community and surrounding areas for over three decades, building a reputation for reliable automotive service and repair.
