

Kelco Cabinets Expands Cabinet Installation Services Across Southwest Missouri Communities

May 07, 2026

SPRINGFIELD, MO - May 07, 2026 -
Kelco Cabinets, a Springfield-based custom cabinet and kitchen remodeling company, has expanded its service footprint to eleven communities throughout Southwest Missouri, responding to growing homeowner demand for professional cabinet installation and remodeling services beyond traditional metropolitan areas.

The expansion encompasses Springfield, Branson, Nixa, Ozark, Bolivar, Willard, Republic, Battlefield, Stockton, Pleasant Hope, and Rogersville, marking a significant regional presence for the custom cabinetry specialist. This geographic growth reflects increasing demand from homeowners in suburban and rural communities seeking access to comprehensive remodeling services previously concentrated in larger urban markets.

"The expansion across Southwest Missouri represents our response to homeowners who have been seeking quality custom cabinetry and professional installation services in their communities," said Preston Kelsch, owner of Kelco Cabinets. "We recognized that residents in smaller communities deserve the same level of

craftsmanship and service options available in Springfield, and we have structured our operations to meet that demand."

The company provides comprehensive kitchen remodeling services including custom cabinet design and installation, countertops, flooring, and backsplash work. Additional offerings include laundry room renovations and office built-ins, addressing the full spectrum of residential cabinetry needs across the region.

Kelco Cabinets has developed its regional service model around efficient project management and clear communication protocols. The company provides written quotes, maintains consistent scheduling across its service area, and emphasizes on-time project completion as fundamental to serving multiple communities effectively.

The expansion aligns with the company's founding mission to become Missouri's preferred cabinetry supplier for home renovation projects. This strategic vision has guided the company's growth from a Springfield-based operation to a regional service provider addressing diverse residential markets.

To support customer education and project planning across its expanded service area, Kelco Cabinets maintains an active YouTube channel featuring remodeling videos that showcase design trends, installation processes, and project examples. These resources help homeowners throughout Southwest Missouri understand cabinet options and remodeling possibilities before beginning their projects.

"Our growth into these communities was driven by customer requests and market analysis showing significant unmet demand for custom cabinetry services," added Kelsch. "Homeowners in Bolivar, Stockton, and Rogersville have the same desires for quality kitchen transformations as those in Springfield or Branson, and we have positioned ourselves to serve them effectively."

The regional expansion encompasses both new construction projects and existing home remodels, with services tailored to meet varying community needs and housing stock characteristics. The company's ability to handle demolition, installation, and finishing work positions it as a comprehensive resource for homeowners undertaking renovation projects.

Kelco Cabinets specializes in custom cabinetry design and installation for residential properties throughout Southwest Missouri. The company offers complete remodeling services including kitchens, laundry rooms, and office spaces, with a focus on quality craftsmanship and project management excellence.
