Crown Plumbing & Water Damage Restoration Announces Comprehensive Disaster Relief Program for San Antonio Families

May 04, 2026

SAN ANTONIO, TX - May 04, 2026 -

Crown Plumbing & Water Damage Restoration today announced the launch of its annual disaster relief support program, providing comprehensive restoration and plumbing assistance to families significantly impacted by fire or major disasters throughout the San Antonio area. The initiative reflects the company's commitment to supporting the local community during times of crisis.

The program combines the company's dual expertise in plumbing services and water damage restoration to address both immediate emergency needs and long-term structural recovery for qualifying families. With recent expansions including new locations on George Road in San Antonio and in Selma, Texas, the company has enhanced its capacity to respond rapidly to disaster situations across the region.

"When disaster strikes a family, the impact extends far beyond the immediate damage," said Jeremy Newman, Director of Operations at Crown Plumbing & Water Damage Restoration. "Our integrated approach means we can address everything from the initial plumbing failures that often accompany disasters to the complete restoration of water and fire-damaged structures, all coordinated through a single point of

contact during an already stressful time."

The comprehensive relief program encompasses the full spectrum of the company's restoration and plumbing capabilities. Restoration services include water damage restoration, fire damage restoration, mold remediation, sewage cleanup, and home reconstruction. The plumbing component addresses emergency repairs, water heater replacements, drain and sewer services, and complete plumbing system restoration.

The expansion of water damage restoration services has positioned the company to handle increasingly complex disaster scenarios. By maintaining both plumbing and restoration divisions, the company can identify and repair the source of water damage while simultaneously addressing structural impacts, preventing secondary damage that often occurs when multiple contractors must coordinate their efforts.

San Antonio faces unique challenges with seasonal flooding, aging infrastructure, and occasional severe weather events that can devastate homes and businesses. The disaster relief program acknowledges these regional vulnerabilities while providing a structured approach to helping affected families recover.

Selection criteria for the program includes families experiencing significant hardship due to fire, flooding, or other major disasters where insurance coverage proves insufficient or unavailable. The company evaluates cases based on need, impact on family stability, and the potential for restoration services to meaningfully improve living conditions.

Crown Plumbing & Water Damage Restoration operates as a full-service plumbing and restoration company serving San Antonio and surrounding communities. The company provides 24/7 emergency response for both plumbing emergencies and water damage situations. Their service portfolio includes traditional plumbing installation and repair, water heater services, drain and sewer maintenance, along with specialized restoration services including asbestos testing and removal, mold testing and remediation, and complete home remodeling and reconstruction following disaster events. The company maintains certifications in water damage restoration, fire damage recovery, and hazardous material handling, enabling comprehensive disaster response capabilities.
