Crown Plumbing & Water Damage Restoration Announces Annual Disaster Relief Support Program for Families in San Antonio

May 04, 2026

SAN ANTONIO, TX - May 04, 2026 -

Crown Plumbing & Water Damage Restoration today announced the launch of its annual disaster relief support program, committing to provide comprehensive restoration and plumbing assistance to one family significantly impacted by fire or major disaster each year. The initiative reflects the company's dedication to supporting the San Antonio community during times of crisis.

The program will provide selected families with complete restoration services, including water damage restoration, fire damage restoration, mold remediation, and necessary plumbing repairs at no cost. The company's recent expansion to new locations on George Road in San Antonio and in Selma, Texas, along with the addition of water damage restoration services to its portfolio, positions the organization to deliver more comprehensive emergency response capabilities across the region.

"When disaster strikes a family, the immediate concern is safety, but the path to recovery can be overwhelming both emotionally and financially," said Jeremy Newman, Director of Operations at Crown Plumbing & Water Damage Restoration. "This program allows us to give back to our community by

providing professional restoration services that help families rebuild their homes and their lives after devastating events."

The company's integrated approach to plumbing and restoration services enables efficient handling of both initial damage and resulting structural issues under one roof. This comprehensive service model eliminates the need for families to coordinate between multiple contractors during already stressful situations. The program will address various disaster-related damages, including water infiltration from burst pipes or flooding, fire and smoke damage, sewage backups, and mold growth resulting from water damage.

Selection criteria for the annual program will consider the severity of damage, family circumstances, and community impact. Local fire departments, emergency services, and community organizations will be invited to nominate families who have experienced significant property damage from disasters. The company plans to announce the first recipient family in the coming months.

"Having both plumbing expertise and restoration capabilities means we can address the root cause of water damage while simultaneously managing the restoration process," added Newman. "This integrated approach significantly reduces the time families spend displaced from their homes and ensures all work meets the highest safety and quality standards."

The disaster relief program builds upon the company's existing 24/7 emergency response services, which have served San Antonio residents for years. The expansion to additional locations strengthens the company's ability to respond quickly to emergencies throughout the greater San Antonio area, including the growing Selma community.

Crown Plumbing & Water Damage Restoration specializes in comprehensive plumbing services and damage restoration throughout San Antonio and surrounding areas. The company provides 24/7 emergency response for water damage restoration, fire damage restoration, mold remediation, sewage cleanup, and complete plumbing services including installation, repair, and maintenance. With certified technicians and state-of-the-art equipment, the company serves both residential and commercial properties, offering integrated solutions that address both immediate damage and underlying plumbing issues.
