

Partitions and Operable Walls Ltd Launches as the UK's Dedicated Movable Wall Repair Specialist

May 06, 2026

PETERBOROUGH, CAM - May 06, 2026 -

Partitions and Operable Walls Ltd has officially launched as a specialist provider of repair, servicing, fault resolution and decoration services for movable wall and partition systems across the United Kingdom. The company, based in Peterborough, Cambridgeshire, brings decades of hands-on expertise to a market where specialist support has historically been difficult to source.

The business services commercial offices, hotels, schools, conference venues and public-sector buildings ? environments where movable walls play a critical role in how spaces are used and managed. The company is reachable on 0330 133 3322 and at <https://partitionsandoperablewalls.co.uk>.

The newly launched website at partitionsandoperablewalls.co.uk provides a full overview of all four service areas, with dedicated pages covering repairs, planned servicing, fault resolution and panel decoration. Facilities managers and estates teams can request a free assessment directly through the site, with the team targeting same-day responses wherever possible. With over 30 years of specialist industry experience,

knowledge spanning multiple manufacturers and systems, and a rapid response repair service available nationwide, Partitions and Operable Walls Ltd is positioned to become the go-to technical support partner for any organisation that depends on movable wall systems for the day-to-day operation of their spaces.

The company also publishes practical guidance and technical articles via its blog, helping facilities professionals better understand the maintenance, servicing and long-term care of their movable wall installations.

The launch comes in response to a clear gap in the market. Many facility managers and estates teams struggle to find engineers with specific experience in operable wall systems, often being directed towards costly full replacements when targeted repairs would restore full function at a fraction of the cost. Partitions and Operable Walls Ltd was founded specifically to address this.

The company holds IPAF, PASMA and CRB accreditations, reflecting its commitment to safety and professionalism on every site. Its team of specialists diagnoses and resolves issues across manual and automated systems, covering mechanical faults, track problems, panel damage and control failures.

Operable Wall Repair: Expert repair services restoring walls to safe, smooth operation with minimal disruption to building use.

Partition Wall Servicing: Planned preventive maintenance programmes that extend the life and reliability of movable wall systems.

Fault Resolution: Specialist diagnosis and resolution of mechanical, track and control faults across manual and automated systems.

Panel Decoration: High-quality panel refurbishment to restore, refresh and modernise the appearance of partition and operable wall systems.

Though newly launched as a formal business, the team behind Partitions and Operable Walls Ltd brings an established track record. Client testimonials reflect the depth of expertise and service quality the company delivers.

Partitions and Operable Walls Ltd is now accepting enquiries from facilities managers, estates teams and property managers across England and Wales. The company offers free initial assessments and can be contacted by telephone on 0330 133 3322 or via the website at partitionsandoperablewalls.co.uk.
