Newton Deck Builders Partners With Advanced Builders Co

May 08, 2026

NEWTON, MA - May 08, 2026 -
The partnership brings expanded custom deck construction and outdoor living services to homeowners across greater Boston and surrounding communities.

All Pro Newton Deck Builders announced a partnership with Advanced Builders Co to broaden its custom deck construction offerings across the greater Boston area. The collaboration, now in effect, combines the two firms' resources to serve homeowners in Newton, Massachusetts, and more than 15 surrounding communities with deck design, installation, repair, and restoration services.

The partnership addresses growing homeowner demand for professionally built outdoor living spaces. According to the National Association of Realtors 2024 Remodeling Impact Report, deck additions recover approximately 100 percent of project costs at resale, making them among the highest-return exterior improvements a homeowner can undertake. All Pro Newton Deck Builders currently provides six distinct service lines, including deck design and installation, deck repair and restoration, patio and hardscape

construction, porch design and installation, shade structure and pergola installation, and pool deck construction. The firm offers both wood and composite material options and provides free in-home consultations before any project begins.

The company's consultation process begins with an on-site assessment where a project lead evaluates the property's grading, soil conditions, and existing structures before recommending materials or layouts. Composite decking, which uses a blend of recycled wood fibers and polymers, has grown to represent roughly 40 percent of the residential deck market nationally, according to the North American Deck and Railing Association. All Pro Newton Deck Builders works with homeowners to weigh the long-term maintenance costs of pressure-treated lumber against the higher upfront investment of composite boards, factoring in the specific weather exposure each property faces across New England's four-season climate.

"We built this company around doing right by the homeowner, and this partnership lets us do that on a larger scale," said John Greene, Owner of All Pro Newton Deck Builders. "Every deck we build starts with listening to what the family actually needs, whether that is a simple repair to keep their kids safe or a full custom deck that changes how they use their backyard. Working with Advanced Builders Co means we can take on more projects without cutting corners on craftsmanship."

A representative for Advanced Builders Co said the partnership was a natural fit given the two companies' shared focus on residential outdoor construction. The firm noted that homeowner inquiries for deck and porch projects in the greater Boston market increased notably over the past two building seasons, and that the collaboration with All Pro Newton Deck Builders positions both companies to meet that demand with shorter project timelines and broader material sourcing.

All Pro Newton Deck Builders currently serves homeowners in Newton, Arlington, Belmont, Boston, Brookline, Cambridge, Dedham, Dover, Medford, Natick, Needham, Somerville, Waltham, Watertown, Wellesley, Weston, and Westwood. The company handles projects ranging from single-railing repairs to multi-level custom deck construction with integrated shade structures. Homeowners interested in a deck contractor for design, new builds, or restoration can request a free estimate with no obligation.

Deck construction in Massachusetts requires compliance with local building codes and, in most municipalities, a building permit before work begins. All Pro Newton Deck Builders manages the permitting process on behalf of homeowners and ensures that all structures meet current load-bearing, railing height, and setback requirements. The company advises homeowners planning summer or fall projects to schedule consultations early in the season, as permitting timelines and material lead times can add several weeks before construction starts.
