

South Shore Basement Finishing Company Earns 2026 Quality Business Award

May 19, 2026

QUINCY, MA - May 19, 2026 -
Massachusetts basement renovation contractor achieves a quality score above 95 percent and earns a top 1 percent national ranking.

South Shore Basement Finishing Company, a basement renovation contractor headquartered in Quincy, Massachusetts, has received the 2026 Quality Business Award for the category of Best Basement Renovation. The recognition, issued by Quality Business Awards USA, places the company among the top 1 percent of evaluated businesses nationwide based on an independently verified quality score exceeding 95 percent.

The Quality Business Awards program evaluates more than 10,000 businesses across all 50 states each year, measuring performance across four categories: customer satisfaction, service delivery, business reputation, and overall quality. South Shore Basement Finishing Company ranked first among basement renovation contractors in the Quincy, Massachusetts area for 2026. The evaluation drew from three or more

independent review sources to arrive at the composite score, a methodology designed to reduce bias from any single platform. The basement finishing company has served the South Shore region of Massachusetts for several years, offering services that include basement remodeling, custom design, waterproofing, home theaters, and additional living space construction.

"This recognition reflects the work our team puts in on every single project," said Susan Snow, Owner of South Shore Basement Finishing Company. "We treat every basement as someone's future living room, home office, or family gathering space, and that mindset shows up in the details. Earning a quality score above 95 percent from an independent evaluator tells us we are on the right track."

The company provides basement renovation services across more than 27 communities on the South Shore of Massachusetts, including Braintree, Hingham, Plymouth, Weymouth, and Brockton, among others. Its service offerings span basement finishing and remodeling, bathroom and bedroom additions, built-in bars and entertainment spaces, home theater installations, and waterproofing solutions. The 2026 award arrives as the home renovation sector continues to see sustained demand, with homeowners seeking to maximize existing square footage rather than relocate. South Shore Basement Finishing Company offers free estimates to homeowners considering a basement renovation project.

The recognition comes at a time when homeowner investment in renovation projects remains significant nationwide. According to the Joint Center for Housing Studies at Harvard University, annual homeowner spending on improvements is projected to reach $522 billion by the end of 2026. Industry analysts note that elevated mortgage rates have contributed to a locked-in effect, with many existing homeowners choosing to renovate rather than sell and purchase at higher borrowing costs. Finished basements, in particular, can return between 23 and 70 percent of project costs at resale depending on the local market, according to data published earlier this year.

South Shore Basement Finishing Company's scope of work typically begins with a consultation and custom design phase before moving into construction. The company addresses waterproofing as a foundational step before any basement finishing or remodeling project, a practice intended to protect completed living spaces from moisture damage common in the region's older housing stock. Projects range from single-room conversions, such as adding a bedroom or bathroom, to full basement transformations that incorporate home theaters, built-in bars, and entertainment areas. The company operates Monday through Friday from 8:00 a.m. to 6:00 p.m. and Saturday from 8:00 a.m. to 12:00 p.m.

"We are seeing more homeowners realize that a basement renovation is one of the most practical ways to add usable space without the cost and disruption of a full addition," said Susan Snow. "That shift is keeping our project pipeline steady, and this award is validation that the quality of work we deliver holds up under independent scrutiny."
