## **All Pro Thornton Deck Builders Expands Services to Arvada**

*May 22, 2026*

THORNTON, CO - May 22, 2026 - PRESSADVANTAGE -

Colorado deck contractor brings over a decade of custom deck building experience to Arvada homeowners.

All Pro Thornton Deck Builders announced this week the formal expansion of its deck building services to homeowners in Arvada, Colorado. The Thornton-based deck contractor, which has operated for more than 10 years across the Denver metropolitan area, now offers full-service custom deck design, installation, and repair to residents of the city, which is home to approximately 123,000 people across 32.8 square miles.

The expansion follows sustained demand from Arvada-area homeowners seeking licensed and insured deck contractors with experience in Colorado's climate conditions. All Pro Thornton Deck Builders holds active licensing, bonding, and insurance through the state of Colorado and specializes in materials engineered for high-altitude UV exposure and temperature swings, including composite products from Trex and vinyl/PVC decking from TimberTech AZEK. The company's service portfolio in the area covers deck design and installation, deck repair and restoration, porch construction, patios and hardscapes, pool decks, and shade structures and pergolas.

"We have been receiving calls from Arvada homeowners for some time now, and making this a dedicated service area was the right step," said David Miller, Owner of All Pro Thornton Deck Builders. "Arvada sits at an elevation where decks face real punishment from the sun and from freeze-thaw cycles. Our team has built and repaired decks under these conditions for over a decade, and that hands-on knowledge is what homeowners need when they are investing in outdoor living space."

Arvada, located within Jefferson and Adams counties, is the seventh-largest city in Colorado. The company noted that residential outdoor improvement projects have grown steadily in the region as homeowners look to add functional space and long-term value to their properties. All Pro Thornton Deck Builders currently operates from its office in Thornton and serves 14 communities throughout Adams, Jefferson, and Weld counties, including Aurora, Broomfield, Westminster, and Denver.

Colorado's Front Range climate presents specific challenges for outdoor structures, including intense ultraviolet radiation at elevation, hailstorms, and daily temperature swings that can exceed 40 degrees Fahrenheit between morning and afternoon. All Pro Thornton Deck Builders addresses these conditions through material selection and construction techniques developed over more than a decade of local projects. Each deck installation includes compliance with local building codes and permitting requirements, and the company's team holds certifications in exterior contracting specific to Colorado regulations.

The company's approach to new projects in Arvada begins with a consultation in which homeowners discuss layout preferences, material options, and budget considerations before any construction begins. All Pro Thornton Deck Builders works with each client through the full project cycle, from initial design and permitting through construction and post-installation maintenance guidance. The company noted that this collaborative process helps ensure the finished deck reflects the homeowner's intended use, whether that involves outdoor entertaining, a private retreat, or adding a pool deck to an existing property.

According to the National Association of Realtors, outdoor living improvements such as deck additions consistently rank among the home renovation projects that recover the highest percentage of cost at resale. For Arvada homeowners considering a deck project, All Pro Thornton Deck Builders offers free estimates with no obligation, allowing property owners to evaluate the scope and cost before committing to construction.

Arvada homeowners can request a free project estimate by calling 720-740-1930 or by visiting [www.thorntoncodeckbuilders.com/deck-builders-arvada-co/](http://www.thorntoncodeckbuilders.com/deck-builders-arvada-co/) to learn more about available deck building services.
