Red Beard Renovations & Remodel Expands Home Renovation Services Following Years of Storm Recovery Experience

May 13, 2026

COVINGTON, LA - May 13, 2026 -
Red Beard Renovations & Remodel, a licensed contracting company serving St. Tammany Parish, Louisiana, has expanded its comprehensive renovation services to address the growing demand for reliable home improvement contractors in communities still recovering from storm damage throughout the region.

The company, founded by Nicholas Kozlowski, a New Orleans Police Department officer, emerged from years of hands-on experience helping Louisiana homeowners rebuild after Hurricane Katrina. What began as volunteer assistance to neighbors in need has evolved into a full-service renovation company offering kitchen and bathroom remodeling, flooring upgrades, structural repairs, and exterior improvements including roofing and replacement siding.

Kozlowski's transition from law enforcement to construction came after witnessing firsthand the devastating impact of dishonest contractors who abandoned projects after taking payment from vulnerable homeowners. During his days off from police work, he regularly assisted families who had been left with incomplete repairs and depleted savings, discovering both a passion and a natural ability for home renovation work.

"Having seen the worst of what can happen when homeowners trust the wrong people with their homes, we built this company on a foundation of transparency and reliability," said Adrienne Folse, a spokesperson from Red Beard Renovations & Remodel. "Every project we undertake reflects our commitment to clear communication, quality craftsmanship, and delivering exactly what we promise without unexpected costs or delays."

The company has established itself as a proven contractor in St. Tammany Parish, serving Mandeville, Covington, Slidell, Madisonville, and surrounding communities. Red Beard specializes in comprehensive

renovation projects that often require multiple trades, from framing and structural repairs to finish work and exterior updates. The company's expertise in moisture management and proper installation techniques has become particularly valuable in Louisiana's humid, storm-prone climate.

Red Beard's service offerings encompass seven primary areas of home improvement. Kitchen remodeling projects include layout optimization, durable finishes, and storage solutions. Bathroom renovations range from simple updates to complete transformations focused on functionality and maintenance. The company also provides flooring installation, professional painting services, and critical structural repairs when projects require walls to be moved or supports reinforced.

For exterior work, the company handles major upgrades including roofing, siding installation, and window replacement, with particular attention to weather protection and long-term durability. Their experience with storm damage repair has made them especially knowledgeable about proper fastening techniques and moisture barriers essential for vinyl siding performance in extreme weather conditions.

The expansion of services comes as many Louisiana homeowners continue addressing deferred maintenance and storm-related repairs while also pursuing modernization projects. Red Beard's approach emphasizes professional standards, maintaining proper licensing and insurance while providing detailed contracts and project management for every job.

Red Beard Renovations & Remodel operates as a licensed and insured contractor throughout Louisiana, bringing professional renovation and remodeling services to residential properties. The company specializes in both interior and exterior improvements, with particular expertise in storm damage repair and comprehensive home renovations.
