

TSS Supply Expands Concrete Coatings Inventory to Support Growing Contractor Demand

May 19, 2026

MEMPHIS, TN - May 19, 2026 - PRESSADVANTAGE -

TSS Supply Inc., a leading supplier of concrete construction materials in the Mid-South region, has expanded its inventory of coating application supplies and epoxy systems to meet increasing demand from contractors nationwide. The expansion includes additional product lines from top manufacturers including Florock, Euclid Chemical, and Rustoleum, along with enhanced same-day delivery capabilities for the Memphis metro area.

The expanded inventory addresses the growing needs of concrete flooring contractors who require reliable access to professional-grade materials for commercial and industrial projects. TSS Supply now stocks a comprehensive range of epoxy coatings, concrete sealers, decorative flakes, joint sealants, and specialized application tools, positioning the company as a one-stop shop for coating professionals.

"The concrete coatings industry has experienced significant growth as property owners increasingly recognize the durability and cost-effectiveness of epoxy and polyurethane systems," said Brad Floyd, Sales Manager at TSS Supply. "By expanding our inventory and maintaining strong relationships with leading manufacturers, we can ensure contractors have immediate access to the materials they need to keep projects on schedule and within budget."

The company's expanded offerings include specialized Memphis concrete coatings supplies ranging from surface preparation equipment to finishing materials. TSS Supply maintains extensive stock of backer rods, abrasives, patching compounds, and concrete repair materials essential for proper surface preparation. The inventory expansion also encompasses personal protective equipment and safety gear required for coating applications.

Beyond product availability, TSS Supply has invested in technical expertise to support contractors navigating product selection and application methods. The company's staff includes concrete coatings specialists who provide guidance on product compatibility, surface preparation requirements, and application techniques specific to various project types.

The expansion coincides with the launch of TSS Supply's enhanced e-commerce platform, enabling contractors across the United States to access the company's full product catalog online. The digital storefront features detailed product specifications, application guides, and real-time inventory status for streamlined ordering.

"Our goal is to eliminate supply chain disruptions that can delay projects and impact contractor profitability," added Floyd. "Whether a contractor needs a single bucket of epoxy or a full truckload of materials, we have the inventory depth and logistics capabilities to deliver quickly and reliably."

TSS Supply also offers equipment rentals for specialized concrete preparation and coating application tools, including concrete grinders, scarifiers, shotblasters, and dust collection systems. This rental program allows contractors to access professional-grade equipment without the capital investment required for purchase.

About TSS Supply Inc., the company has served the construction industry for over three decades, establishing itself as a trusted source for concrete construction materials and expertise. The company carries products from renowned manufacturers including Euclid Chemical, Dow Corning, and other industry-leading brands. TSS Supply operates from its Memphis facility, providing same-day and next-day delivery options throughout the Memphis metropolitan area while serving contractors nationwide through its e-commerce platform.
