Piedmont Paint & Finish Expands Cabinet Painting Services with Professional Spray-Booth Facility

May 12, 2026

Charlottesville, VA - May 12, 2026 -
Piedmont Paint & Finish has expanded its service capabilities with a dedicated professional spray-booth facility designed to deliver premium cabinet refinishing services to Charlottesville area homeowners. The specialized shop environment allows the company to provide flawless finishes on solid wood, laminate, and custom artistic cabinet designs while eliminating the disruption typically associated with on-site kitchen renovations.

The expansion addresses growing demand from homeowners seeking cost-effective alternatives to full kitchen replacements. By transporting cabinets to their controlled shop environment, the company can achieve superior results while minimizing inconvenience to clients' daily routines.

"Our spray-booth facility represents a significant advancement in how we serve Charlottesville homeowners," said Charles Davis, Operations Manager at Piedmont Paint & Finish. "The controlled environment allows us to achieve factory-quality finishes that simply cannot be replicated with on-site painting. We're seeing tremendous interest from clients who want professional results without the extended timeline and expense of full cabinet replacement."

The facility features professional-grade spray equipment and ventilation systems that ensure consistent application and optimal drying conditions. This controlled setting enables technicians to work with a wider range of specialty finishes and techniques than would be practical in residential settings. The process typically involves removing cabinet doors and drawers, transporting them to the shop for refinishing, and reinstalling them once the finish has properly cured.

As a Charlottesville painting contractor, Piedmont Paint & Finish has built its reputation on delivering professional results with extensive experience in both residential and commercial applications. The company's expansion into specialized cabinet refinishing reflects its commitment to meeting evolving

customer needs while maintaining the quality standards that have defined its work throughout the region.

The shop-based approach offers several advantages over traditional on-site cabinet painting. The controlled temperature and humidity levels ensure optimal paint adhesion and curing, while the professional spray equipment delivers an even, streak-free finish. Additionally, the off-site process eliminates concerns about paint fumes, overspray, and the general disruption that accompanies major kitchen work.

Homeowners interested in high-end cabinet painting at Piedmont Paint & Finish's shop can choose from various finish options, including solid colors, wood stains, glazes, and custom artistic treatments. The company works with each client to determine the most appropriate finish for their specific cabinet material and desired aesthetic outcome.

Piedmont Paint & Finish operates as a full-service painting company serving Charlottesville and surrounding areas. In addition to its specialized cabinet refinishing services, the company provides residential and commercial painting, power washing, and operates Pigment Paint Supply, a retail location offering various paint brands and supplies. The company has earned recognition for its professional approach, attention to detail, and commitment to customer satisfaction across all service lines.
