

Bennett Lawn and Landscape Announces Membership with Landscape Ontario Horticultural Trades Association

May 12, 2026

OTTAWA, ON - May 12, 2026 - PRESSADVANTAGE -

Bennett Lawn and Landscape has officially joined the Landscape Ontario Horticultural Trades Association, a recognized organization representing horticulture professionals across Canada. The membership marks a continued commitment by the Ottawa-based company to industry standards, professional development, and quality service delivery for residential and commercial clients.

Landscape Ontario represents thousands of horticulture businesses and serves as a central body for training, advocacy, and professional benchmarking within the industry. Membership connects companies with vetted peers, continuing education resources, and established best practices that inform day-to-day operations. For clients, affiliation with the association indicates that a company meets recognized professional criteria and participates in ongoing industry development.

The decision to pursue Landscape Ontario membership reflects a deliberate focus on accountability within the horticulture trades. Companies listed in the association's official member directory are held to established professional guidelines, giving residential and commercial property owners an additional point of verification

when selecting a landscaping contractor. For an industry where trust and workmanship are closely linked, that verification carries practical value for property owners evaluating their options.

"Joining Landscape Ontario reflects where we want to go as a company," said Isaac Bennett, Owner of Bennett Lawn and Landscape. "Being part of this network means holding ourselves to a standard that our clients can measure us against, and that accountability matters to us."

Bennett Lawn and Landscape provides a comprehensive range of hardscaping and landscaping services Ottawa homeowners and businesses rely on for durable, practical results. The company's offerings include interlock patios, walkways, driveways, retaining walls, and custom outdoor living spaces. Each project is approached with attention to structural integrity, thoughtful design, and long-term performance, serving residential and commercial properties throughout Ottawa and surrounding areas. The company's work spans new installations, property renovations, and seasonal maintenance, covering a broad scope of outdoor improvement needs for both homeowners and commercial operators.

Landscape Ontario membership is open to companies operating within the horticulture trades and requires adherence to the association's professional guidelines. As part of its membership, Bennett Lawn and Landscape gains access to industry training programs, peer networks, and resources that support continuous improvement in service delivery and technical expertise. These resources allow member companies to stay current with evolving industry standards and deliver consistent results across a range of project types.

Demand for professional landscaping services Ottawa property owners seek has grown steadily in recent years, driven by increased interest in outdoor living spaces and long-term property investment. As more homeowners and businesses prioritize quality outdoor environments, trade association membership has become an increasingly meaningful indicator of a contractor's commitment to professional standards. Membership in a recognized body such as Landscape Ontario signals that a company is invested in the long-term health of the industry, not just individual project outcomes.

Bennett Lawn and Landscape's inclusion in the Landscape Ontario member directory also reflects a broader industry trend toward greater transparency and professionalism within the horticulture sector. As consumer expectations continue to evolve, companies that invest in professional development and industry affiliation are better positioned to meet the demands of a growing market.

About Bennett Lawn and Landscape: Bennett Lawn and Landscape is an Ottawa-based company specializing in residential and commercial landscaping and hardscaping services. The company provides solutions for interlock installation, lawn care, and outdoor design, helping property owners create functional,

well-constructed outdoor spaces built to last.
