

Monett Veterinary Hospital Emphasizes Comprehensive Animal Healthcare Services for Aurora Area Pet Owners

June 04, 2026

MONETT, MO - June 04, 2026 -
Monett Veterinary Hospital continues to expand its reach in southwestern Missouri, providing comprehensive veterinary services to pet owners in Aurora and surrounding communities. The AAHA-accredited facility, which has served the region since 1953, maintains its commitment to delivering advanced medical care alongside traditional veterinary services to meet the evolving needs of modern pet ownership.

The hospital's expanded service area now encompasses Aurora, Missouri, where pet owners increasingly seek specialized veterinary care closer to home. Monett Veterinary Hospital offers a complete range of services from routine wellness examinations to advanced surgical procedures, including orthopedic surgery, laser surgery, and radiowave surgery. The facility also provides diagnostic radiology, internal medicine consultations, and maintains a complete in-house laboratory for rapid diagnostic testing.

"Pet owners in Aurora and throughout southwestern Missouri deserve access to comprehensive veterinary care that addresses both routine and complex medical needs," said Erin Carnes, Practice Manager at Monett

Veterinary Hospital. "Our team combines decades of experience with modern veterinary technology to ensure each patient receives personalized care tailored to their specific health requirements and life stage."

The hospital's preventive care programs form the foundation of its approach to Monett Vet Animal Care and Pet Healthcare. These programs include customized wellness plans, vaccination protocols, parasite prevention strategies, and nutritional counseling. The facility's TLC Wellness Care Program provides structured preventive care plans that include routine testing, examinations, and vaccinations designed to maintain optimal pet health throughout every life stage.

Beyond medical services, the hospital offers comprehensive boarding facilities for both dogs and cats, featuring climate-controlled environments and species-specific accommodations. The boarding program includes daily health observations, medication administration when required, and adherence to individual dietary requirements. Additionally, the facility provides professional grooming services and doggie daycare, creating a one-stop destination for pet care needs.

The hospital's commitment to excellence extends beyond clinical care. As an AAHA-accredited facility, Monett Veterinary Hospital adheres to rigorous standards covering patient care, diagnostic protocols, medical recordkeeping, and facility management. The hospital received the AAHA Commitment to Excellence Award in 2007 and was recognized as a Veterinary Economics Architectural Award Excellence winner.

"Our philosophy centers on building lasting relationships with pets and their families through education, support, and compassionate care," added Carnes. "Whether providing emergency treatment, performing routine surgery, or offering preventive wellness services, our team approaches each case with the same dedication to excellence that has defined our practice for over seven decades."

Monett Veterinary Hospital traces its roots to 1953 when Dr. C.J. McCormick established the practice. From its origins as a single-veterinarian clinic, the hospital has evolved into a comprehensive animal care facility serving Pierce City, Purdy, Cassville, Mt Vernon, Aurora, and surrounding communities. The hospital maintains a complete pharmacy, offers therapeutic and prescription diets, and provides financing options to ensure veterinary care remains accessible to all pet owners in the region.
