

Belmont Plastic Surgery Advances Comprehensive Aesthetic Care for Northern Virginia Patients

May 15, 2026

May 15, 2026 -
Belmont Plastic Surgery in Stafford, Virginia, continues to expand its comprehensive approach to cosmetic and reconstructive procedures, offering patients throughout Northern Virginia access to advanced surgical techniques and non-invasive aesthetic treatments under one practice.

The award-winning clinic, which has served the region for over 15 years, maintains a focus on individualized patient care while providing an extensive range of procedures from breast augmentation and reconstruction to facial rejuvenation and body contouring. This comprehensive approach allows patients to address multiple aesthetic concerns through coordinated treatment planning.

"The evolution of cosmetic surgery has moved toward more personalized treatment strategies that consider each patient's unique anatomy and aesthetic goals," said Dr. Jules Feledy, lead surgeon at Belmont Plastic Surgery. "By offering both surgical and non-surgical options, we can create treatment plans that deliver natural-looking results while minimizing recovery time when appropriate."

The practice's breast surgery program encompasses both cosmetic and reconstructive procedures, including augmentation, lifts, reductions, and advanced reconstruction techniques such as DIEP flap and TRAM flap procedures. These reconstructive options provide cancer patients with surgical solutions that restore appearance while maintaining feminine contours.

Facial rejuvenation services at the clinic range from surgical procedures like facelifts, neck lifts, and rhinoplasty to non-invasive treatments including Botox, Dysport, and dermal fillers such as Juvederm and Restylane. The addition of thread lifts and laser treatments provides patients with alternatives to traditional surgical approaches.

Body contouring procedures remain a significant focus, with services including liposuction, Smart Lipo laser-assisted fat removal, tummy tucks, and Brazilian butt lifts using the patient's own fat for enhancement. The practice also offers combination procedures such as mommy makeovers, which address multiple areas affected by pregnancy and childbirth.

"Patient education remains central to our practice philosophy," noted Dr. Feledy. "Understanding the differences between procedures, recovery expectations, and potential outcomes helps patients make informed decisions about their aesthetic journey."

The Belmont Plastic Surgery - Stafford plastic surgeon team emphasizes the importance of board certification and experience in achieving optimal surgical outcomes. The practice's 15-year presence in Northern Virginia has established it as a resource for patients seeking both cosmetic enhancement and reconstructive solutions.

Non-surgical skin care treatments complement the surgical offerings, providing patients with options for maintaining and enhancing results through professional-grade treatments and laser therapies. This integrated approach to aesthetic care allows for ongoing skin health management beyond surgical interventions.

Belmont Plastic Surgery serves Stafford and the broader Northern Virginia region with board-certified cosmetic surgery expertise. The practice specializes in breast surgery, facial procedures, body contouring, and non-invasive aesthetic treatments, maintaining a patient-centered approach to cosmetic and reconstructive care. With over 15 years of experience, the clinic has established itself as a comprehensive aesthetic surgery center offering advanced techniques in both surgical and non-surgical rejuvenation.
