

## **Quality Pro Painting Announces Enhanced Deck and Fence Staining Services for Bentonville Area Homeowners**

*June 10, 2026*

June 10, 2026 - PRESSADVANTAGE -

Quality Pro Painting, a Northwest Arkansas painting contractor established in 2017, announces the expansion of its specialized deck and fence preservation services throughout Bentonville and surrounding communities. The company has enhanced its outdoor wood maintenance offerings to address increasing demand for professional staining and sealing services as property owners prepare for the region's challenging weather conditions.

The expanded service offerings come as homeowners across Northwest Arkansas face ongoing challenges protecting outdoor wood structures from intense sun exposure and frequent rainfall. Quality Pro Deck & Fence Painting and Staining services now include comprehensive wood assessment, surface preparation, and application of premium protective coatings designed specifically for Arkansas climate conditions.

"Outdoor wood structures in Northwest Arkansas deteriorate rapidly without proper maintenance, often

requiring complete replacement within just a few years," said Obed Posadas, founder of Quality Pro Painting. "Our enhanced staining and sealing processes extend the lifespan of decks and fences significantly, protecting homeowners' investments while maintaining the aesthetic appeal of their outdoor spaces."

The company's specialized approach addresses common issues affecting untreated outdoor wood, including UV damage, moisture penetration, mold growth, and structural weakening. Professional technicians evaluate each structure's condition before recommending appropriate treatment options, ensuring optimal protection against Arkansas's variable weather patterns.

Quality Pro Local Painters have observed a marked increase in requests for preventive maintenance services, particularly from homeowners who have experienced premature wood deterioration. The company's expanded services include both oil-based and water-based staining options, clear sealants, and semi-transparent finishes that enhance wood grain while providing maximum protection.

The timing of this service expansion aligns with recent industry data showing that professionally maintained decks and fences last three to five times longer than untreated structures in similar climate conditions. Regular professional maintenance also prevents costly repairs and replacements that often result from neglected outdoor wood.

"Property owners frequently underestimate how quickly Arkansas weather can damage exposed wood," added Posadas. "By implementing regular maintenance schedules, homeowners can preserve both the functionality and beauty of their outdoor living spaces for years to come."

The company serves multiple communities throughout Northwest Arkansas, including Bentonville, Rogers, Fayetteville, Springdale, and Bella Vista. Licensed and insured technicians provide detailed assessments and transparent pricing for all projects, ensuring homeowners understand the scope and benefits of recommended treatments.

Quality Pro Painting has built its reputation on delivering professional painting and staining services throughout Northwest Arkansas since 2017. The company specializes in residential and commercial painting projects, including interior painting, exterior painting, and specialized outdoor wood preservation. With over 15 years of combined industry experience, the team focuses on using premium materials and proven application techniques to ensure lasting results for every project.
