

Williams and Sons Custom Construction and Design Expands Home Additions Services Throughout Jenkins and Southwest Missouri

June 15, 2026

CASSVILLE, MO - June 15, 2026 -
Williams and Sons Custom Construction and Design has expanded its home additions and renovation services to better serve homeowners throughout Southwest Missouri, including Jenkins, Monett, Golden, Eagle Rock, Shell Knob, and Cassville. The family-owned construction company, which has built custom homes in the region for over 50 years, now offers comprehensive solutions for homeowners looking to expand and enhance their existing properties rather than relocate.

The expansion addresses growing demand from area residents who want to modify their current homes to accommodate changing family needs, work-from-home requirements, and multi-generational living arrangements. The company's enhanced service offerings include room additions, second-story expansions, kitchen and bathroom extensions, attached garages, and separate structures such as pool houses and workshops.

"We recognized that many families in Southwest Missouri have deep roots in their communities and want to stay in their homes while adapting them to meet evolving needs," said Trevor, spokesperson for Williams and Sons Custom Construction and Design. "Our expanded home additions services allow homeowners to create the extra space they need without the disruption and expense of moving to a new property. We handle everything from initial design and permits through construction and final finishes, ensuring a seamless experience for our clients."

Williams and Sons Home Additions services encompass the complete project lifecycle, beginning with free consultations where the company's design team works directly with homeowners to understand their vision and requirements. The company's in-house design services enable real-time blueprint modifications, ensuring that planned additions integrate perfectly with existing structures while meeting all local building codes and regulations.

The construction firm maintains its commitment to quality craftsmanship and clear communication throughout each project. Property owners receive regular updates during construction, with company leadership maintaining an active presence on job sites to oversee progress and address any concerns immediately. The company has established a reputation for completing projects on schedule while maintaining clean, organized work areas that minimize disruption to households.

The expansion of home additions services reflects broader trends in the residential construction industry, where homeowners increasingly choose to improve existing properties rather than purchase new homes. Rising real estate prices and limited housing inventory have made home additions an attractive alternative for families needing additional space.

As a Williams and Sons Trusted Contractor, the company brings five decades of construction expertise to each home addition project. The firm's experience spans simple room additions to complex multi-level expansions, with capabilities to match various architectural styles prevalent throughout Southwest Missouri. Each project receives the same attention to detail and craftsmanship that has defined the company's custom home building services since its founding.

Williams and Sons Custom Construction and Design operates as a full-service residential construction company specializing in custom homes, new construction, and home additions throughout Southwest Missouri. The family-owned business combines traditional craftsmanship with modern construction techniques to deliver projects that meet contemporary living standards while respecting the architectural heritage of the region.
